Mobile Telecommunications in a High Speed World tells the story of 3G and higher speed mobile communication technologies Over ten years have passed since the first third generation 3G licences were awarded following debates about the merits of auctions versus beauty contests then nothing much happened More licences were issued a few roll outs commenced and everyone began to think it had all been a horribly expensive mistake That may still turn out to be the case but in the meantime there have been massive developments in terms of the number of licences and launches worldwide in the range of services that can be accessed in the range of devices that can be used to access them in operator strategies etc Even the technology has improved considerably with 4G now under discussion Much of this story has been chronicled largely on the Internet but the information is in tens of thousands of bits and pieces and a large part of it is either misleading or just plain wrong Here Peter Curwen and Jason Whalley introduce the outcomes of research that has involved the compilation of a

unique database which details every licence and launch worldwide involving 3G The authors discuss the structure of the industry and the strategic behaviour of operators as well as the social consequences of the spread of 3G They examine the role of new entry upon competition and present analysis of the main operators involved the development of handsets and especially smartphones A number of country case studies are included This comprehensive and up to date volume includes a number of country studies and is written by two of the world s foremost researchers on this industry Mobile Telecommunications in a High Speed World will serve the needs of students academics and those involved or contemplating involvement with the telecoms industry Why pay thousands of dollars to consultancies to separate the wheat from the chaff with respect to 3G when you can read this book Behavior Change Research and Theory Linda Little,Elizabeth Sillence,Adam Joinson,2016-11-11 Behavior Change Research and Theory Psychological and Technological Perspectives provides a unified account of behavior change theories and broad coverage of application domains and best practices From a psychological and human computer interaction perspective the book puts a strong emphasis on the psychological foundations of behavior change and explores the relationship between technology and behavior change It will cover the major behavior change theories planned behavior health belief model protection motivation transtheoretical and more recent approaches to behavior change like Nudge and Mindspace The section on health research and behavior change will cover interventions like diet and fitness mental health smoking cessation and diabetes management Topics also include financial and security research and behavior change in relation to financial and other forms of sensitive information passwords phishing and financial transactions The last section will highlight the challenges and opportunities afforded by the increasing use of mobile technology with respect to the design of programs and apps aimed at facilitating behavior change and the role of social media Provides case studies of key theoretical models of behavior change Evaluates the success of key theories Details cost benefit analyses of each particular approach Includes techniques such as implementation intentions self affirmation feedback and social support Offers practical consideration of the impact of technology and design Delves into sustainability issues such as recycling and energy reduction Highlights future directions for research **FCC Record** United States. Federal Communications Commission,2011-06-27 *Mobile Technology and Social Transformations* Stefanie Felsberger,Ramesh Subramanian,2021-05-03 This book investigates the ways in which the mobile telephone has transformed societies around the world bringing both opportunities and challenges At a time when knowledge and truth are increasingly contested the book asks how mobile technology has changed the ways in which people create disseminate and access knowledge Worldwide mobile internet access has surpassed desktop access and it is estimated that by 2022 there will be AN excess of 6 billion mobile phone users in the world This widespread proliferation raises all sorts of questions around who creates knowledge how is that knowledge shared and proliferated and what are the structural political economic and legal conditions in which knowledge is accessed The practices and power dynamics around mobile technologies are location specific They

look different depending on whether one chooses to highlight the legal social political or economic context Bringing together scholars journalists activists and practitioners from around the world this book embraces this complexity providing a multifaceted picture that acknowledges the tensions and contradictions surrounding accessing knowledge through mobile technologies With case studies from Hong Kong South Korea India Syria Egypt Botswana Brazil and the US this book provides an important account of the changing nature of our access to knowledge and is key reading for students researchers activists and policy makers with an interest in technology and access to knowledge communication social transformation and global development
