The Marion Experiment Stephen C. Richards,2015-01-21 Taking readers into the darkness of solitary confinement this searing collection of convict experiences academic research and policy recommendations shines a light on the proliferation of supermax super maximum security prisons and the detrimental effects of long term high security confinement on prisoners and their families Stephen C Richards an ex convict who served time in nine federal prisons before earning his PhD in criminology argues the supermax prison era began in 1983 at USP Marion in southern Illinois where the first control units were built by the Federal Bureau of Prisons The Marion Experiment written from a convict criminology perspective offers an introduction to long term solitary confinement and supermax prisons followed by a series of first person accounts by prisoners some of whom are scholars previously or currently incarcerated in high security facilities including some of the

roughest prisons in the western world Scholars also address the widespread Marionization of solitary confinement its impact on female adolescent and mentally ill prisoners and families and international perspectives on imprisonment As a bold step toward rethinking supermax prisons Richards presents the most comprehensive view of the topic to date to raise awareness of the negative aspects of long term solitary confinement and the need to reevaluate how prisoners are housed and treated
