

# Process Paper Outline

The Process Paper is a very important part of the judging process. It is the first thing that judges read, so you don't want to save this part of your History Day project until the last minute. The Process Paper has three parts:

## 1. Title Page

- Title of Project
- Student Name(s) **[Omit for DLS competition]**
- Senior Division & Entry Category (media, exhibit, performance)

**DO NOT** include your grade, school name or teacher name!

## 2. Process Description (500 words, 4-5 Paragraphs)

- How did you get the idea for this topic?
- Where did you go for your research? What types of sources (newspapers, documents, interviews, etc.) did you use?
- How has your understanding of this topic changed as you have worked on your research?
- How did you put your presentation together? What skills did you learn?
- **How does your topic relate to the theme "Taking a Stand in History?"**
- **Why is this topic important in history?**

## 3. Annotated Bibliography

- Separate into Primary and Secondary sources and alphabetize.
- Use a two-sentence annotation format:
  1. What is this source?
  2. How was it useful to your project?
- Use MLA or Turabian guide for your citations.

Process paper must be printed on plain white paper and stapled in the upper lefthand corner. **NO COVERS! NO ARTWORK OR SPECIAL PAPERS!** Bring at least four copies of your process paper when you are judged at the regional or state competition. (**TWO** copies for DeLaSalle History Day)

assembly into nanoscale fibrils Intrinsically disordered peptides and proteins play a major role particularly in aggregation and self assembly processes that lead to various diseases Alzheimer Parkinson Huntington Mad Cow Therefore the relevance of protein disorder for protein self assembly deserves a closer look Protein self assembly cannot be separated from protein folding since it is frequently the product of misfolding With regard to modern theories the folding processes are linked to insights on protein dynamics and the discovered relationship between proteins and spin glasses The readers will benefit from being provided with an in depth overview of the physical concepts that govern different aspects of protein folding disorder and self assembly By emphasizing the relationship between these issues the approach adds a holistic character to the book The book is to a major extent mathematically based Mathematics is part of the language of physicists and physical chemists which cannot be properly substituted by words For instructors the book will offer a unique source for her his teaching of current protein physics issues The way how the book will be constructed multiple references to primary literature with DOI links literature based problem sets and topics for discussion will facilitate a learning process suitable for research oriented students Problem solving frequently requires the writing of short computer programs something that is underemphasized in chemistry and biochemistry education with the exception of computationally trained students of course

such as developing countries and civil society and find that global governance often reinforces wider power disparities between and within nation states But at the same time the contributors note governance arrangements often provide nondominant stakeholders with the policy space needed to advance their interests more effectively Each chapter concludes with a set of policy recommendations for the promotion of an open dynamic and more equitable networked order Contributors Peng Hwa Ang Jonathan D Aronson Byung il Choi Tracy Cohen Peter F Cowhey William J Drake Henry Farrell Rob Frieden Alison Gillwald Boutheina Guermazi Cees J Hamelink Ian Hosein Wolfgang Kleinwächter Don MacLean Christopher May Milton Mueller John Richards David Souter Ernest Wilson III Jisuk Woo      **The Analytical Writer** Adrienne Robins, 1995-09 In *The Analytical Writing* Adrienne Robins explains college writing as a process of discovery as a series of strategies that any college student can learn to apply All strategies explained in this text are based on sound theories of teaching writing and on the patterns of successful writers Writing and thinking should not be separated and presenting only the steps without the accompanying explanation of how they influence thinking would be of little more help than having no method at all By using this text the students will see as they plan draft and revise how their writing helps clarify their thoughts This clearly written and engaging textbook is illustrated by real examples of student writing and appropriate cartoons The second edition was revised and updated based on the large scale evaluation of the first edition completed by professors and students The new edition reflects four essential values recognizing the diversity of writing processes the necessity of peer and teacher interaction with the writer on drafts the integration of writing and reading and the appropriate uses of technology Specific features of this second edition include new writing samples electronic citation formats updated library use chapter with technological guidance concise paragraph chapter revised introduction and conclusion chapter rhetorical as well as grammatical explanations for punctuation usage new cartoons exercises drawn from students papers a condensed chapter on research papers and an expanded and clearer chapter on special assignments and other writing tasks A Collegiate Press book
