The Book World Nicola Louise Wilson, 2016-05-18 British literature underwent profound changes in the period 1900-1940. What role did audiences and channels of book distribution play in this? In this wide-ranging collection, the influence of publishers, distributors, librarians, and readers comes to the foreground to open up new perspectives on literature and print culture. Rooted in original archival research, chapters include studies of the engagement of canonical writers and bestsellers with the literary marketplace, the influence of international and mobile audiences, publishing practices involving genre promotion and censorship, and the significance of spaces of reading, including bookshops, circulating libraries, and on-board passenger ships. Through a series of detailed case studies that focus on under-explored aspects of distribution and readership, the contributors open up new perspectives on literature and the British book trade.

The Digital Literary Sphere Simone Murray, 2018-10-01 How has the Internet changed literary culture? Katherine Hayles Award for Criticism of Electronic Literature by The Electronic Literature Organization. Reports of the book's death have been greatly exaggerated. Books are flourishing in the Internet era, widely discussed and reviewed in online readers' forums and publicized through book trailers and author blog tours. But over the past twenty-five years, digital media platforms have undeniably transformed book culture. Since Amazon's founding in 1994, the whole way in which books are created, marketed, publicized, sold, reviewed, showcased, consumed, and commented upon has changed dramatically. The digital literary sphere is no mere appendage to the world of print; it is where literary reputations are made, movements are born, and readers passionately engage with their favorite works and authors. In *The Digital Literary Sphere*, Simone Murray considers the contemporary book world from multiple viewpoints. By examining reader engagement with the online personas of Margaret Atwood, John Green, Gary Shteyngart, David Foster Wallace, Karl Ove Knausgaard, and even Jonathan Franzen, among others, Murray reveals the dynamic interrelationship of print and digital technologies. Drawing on approaches from literary studies, media and cultural studies, book history, cultural policy, and the digital humanities, this book asks: What is the significance of authors communicating directly to readers via social media? How does digital media reframe the live author-reader encounter? And does the growing army of reader reviewers signal an overdue democratizing of literary culture or the atomizing of cultural authority? In exploring these questions, *The Digital Literary Sphere* takes stock of epochal changes in the book industry while probing books and digital media's complex contemporary coexistence.

Seed Libraries Cindy Conner, 2015-02-01 Community based initiatives to preserve and protect our food supply Historically seed companies were generally small often family run businesses Because they were regionally based they could focus on varieties well suited to the local environment A Pacific Northwest company for example would specialize in different cultivars than a company based in the Southeast However the absorption of these small independent seed businesses into large multinationals combined with the advancement of biotechnology resulting in hybrids and GMO seeds has led to a serious loss of genetic diversity The public is now at the mercy of the corporations that control the seeds In the past few years gardeners have realized the inherent danger in this situation A growing movement is striving to preserve and expand our stock of heritage and heirloom varieties through seed saving and sharing opportunities Seed Libraries is a practical guide to saving seeds through community programs including Step by step instructions for setting up a seed library A wealth of ideas to help attract patrons and keep the momentum going Profiles of existing libraries and other types of seed saving

partnerships Whoever controls the seeds controls the food supply By empowering communities to preserve and protect the genetic diversity of their harvest Seed Libraries is the first step towards reclaiming our self reliance while enhancing food security and ensuring that the future of food is healthy vibrant tasty and nutritious Cindy Conner is a permaculture educator founder of Homeplace Earth and producer of two popular instructional gardening DVDs She is also the author of Grow a Sustainable Diet
