

Blending

Enhanced Blending

The active brush uses the Enhanced Layer Blending technology. Blending controls determine how a brush covers color to the paper and blends with underlying colors. Whether you are painting on a layer with one color or blending two or more colors, Enhanced Layer Blending helps you create brushstrokes without white fringes.

Brushstrokes without (left) and with Enhanced Layer Blending (right)

To access and adjust Blending settings, click **Window > Brush Control Panels > Blending**.

Blend lets you control how much the brush colors cover underlying colors, including the paper color. When **Blend** is higher than **Resaturation**, more color blends than covers, so the stroke never reaches full opacity.
