Neutrinos in Astro, Particle and Nuclear Physics Amand Faessler,1998 Hardbound In cosmology the neutrinos determine the expansion rate of the early universe They probably constitute part of hot dark matter and are essential for supernova explosions In spite of great efforts the missing solar neutrinos are not completely understood Various solar neutrino experiments seem to give different results about the missing solar neutrinos However each of these experiments such as the C1 detector GALLEX SAGE and KAMIOKANDE measure slightly different quantities Only GALLEX and SAGE look exactly for the same neutrinos and seem to be in agreement with each other This volume of review articles looks in depth at the latest research results and presents a state of art view of this fast expanding field All the chapters are written by leading experts active in the field today
