TABLE 1. *Summary of the 1997-1998 season for the 10 most common species of ticks found on humans in the United States. The table lists the number of specimens collected, the number of human hosts, and the number of human bites. The number of human bites is the number of bites reported by the host or the number of bites observed by the collector. The number of human bites is not necessarily equal to the number of human hosts because some hosts may have been bitten by more than one tick.*
