How To Save Our Planet Mark A. Maslin, 2021-05-06 Punchy and to the point No beating around the bush This brilliant book contains all the information we need to have in our back pocket in order to move forward Christiana Figueres Former Executive Secretary UN Climate Change Convention Amazing book Chris Evans Virgin Radio Breakfast Show Everyone should have this book Rick Edwards BBC Radio 5 Live A timely and important book not only laying out the facts but suggesting real solutions to the challenges facing us Professor Alice Roberts Anatomist Professor of Public Engagement in Science University of Birmingham

How can we save our planet and survive the 21st century How can you argue with deniers How can we create positive change in the midst of the climate crisis Professor Mark Maslin has the key facts that we need to protect our future Global awareness of climate change is growing rapidly Science has proven that our planet and species are facing a massive environmental crisis How to Save Our Planet is a call to action guaranteed to equip everyone with the knowledge needed to make change Be under no illusion the challenges of the twenty first century are immense We need to deal with climate change environmental destruction global poverty and ensure everyone s security We have the technology We have the resources We have the money We have the scientists the entrepreneurs and the innovators We lack the politics and policies to make your vision of a better world happen So we need a plan to save our planet How to Save Our Planet is your handbook of how we together can save our precious planet From the history of our planet and species to the potential of individuals and our power to create a better future Maslin inspires optimism in these bleak times We stand at the precipice The future of our planet is in our hands It s time to face the facts and save our planet from and for ourselves

_____ A handbook of clearly established authoritative facts and figures about the terrible toll we as

humans have taken of our planet plus ways in which we can lessen the impact For laypeople like me who can see what is happening but haven't always got the precise statistics to hand it's hugely valuable John Simpson CBE BBC World Affairs Editor Broadcaster Author Columnist Saving the world is no small thing but picking up this book's a good start Paris Lees Contributing Editor at British Vogue campaigner I love it My kids love it Chris Evans Virgin Radio Breakfast Show A no nonsense crib sheet on the state of the world and how to help it The I Newspaper World Development Report 2015 World Bank, 2014-12-04 Development economics and policy are due for a redesign In the past few decades research from across the natural and social sciences has provided stunning insight into the way people think and make decisions Whereas the first generation of development policy was based on the assumption that humans make decisions deliberately and independently and on the basis of consistent and self-interested preferences recent research shows that decision making rarely proceeds this way People think automatically when deciding they usually draw on what comes to mind effortlessly People also think socially social norms guide much of behavior and many people prefer to cooperate as long as others are doing their share And people think with mental models what they perceive and how they interpret it depend on concepts and worldviews drawn from their societies and from shared histories The World Development Report 2015 offers a concrete look at how these insights apply to development policy It shows how a richer view of human behavior can help achieve development goals in many areas including early childhood development household finance productivity health and climate change It also shows how a more subtle view of human behavior provides new tools for interventions Making even minor adjustments to a decision making context designing interventions based on an understanding of social preferences and exposing individuals to new experiences and ways of thinking may enable people to improve their lives The Report opens exciting new avenues for development work It shows that poverty is not simply a state of material deprivation but also a tax on cognitive resources that affects the quality of decision making It emphasizes that all humans including experts and policy makers are subject to psychological and social influences on thinking and that development organizations could benefit from procedures to improve their own deliberations and decision making It demonstrates the need for more discovery learning and adaptation in policy design and implementation The new approach to development economics has immense promise Its scope of application is vast This Report introduces an important new agenda for the development community

Corporate Power and Human Rights Manette Kaisershot, Nicholas Connolly, 2018-02-02 There is ample evidence about the negative effects business activity of all types can have on the provision of human rights Equally there can be little doubt economic development usually driven through business activity and trade is necessary for any state to provide the institutions and infrastructure necessary to secure and provide human rights for their citizens The United Nations and businesses recognise this tension and are collaborating to effect change in business behaviours through voluntary initiatives such as the Global Compact and John Ruggie's Guiding Principles Yet voluntary approaches are evidently failing to prevent human rights violations and there are

few alternatives in law for affected communities to seek justice This book seeks to robustly challenge the current status quo of business approaches to human rights in order to develop meaningful alternatives in an attempt to breach the gap between the realities of business and human rights and its discourse This book was previously published as a special issue of the International Journal of Human Rights *A Dangerous World?* Christopher A. Preble, John Mueller, 2014-10-14 In 2013 Chairman of the Joint Chiefs of Staff Gen Martin Dempsey stated that the world is more dangerous than it has ever been Is this accurate Do we live in a world that is uniquely dangerous Is it possible that the many threats and dangers promoted by policymakers and the media are exaggerated or overblown In this timely edited volume experts on international security assess and put into context the supposed dangers to American security The authors examine the most frequently referenced threats including wars between nations and civil wars within nations and discuss the impact of rising nations weapons proliferation general unrest terrorism transnational crime and state failures
