Robo Sapiens Japonicus Jennifer Robertson, 2018 Japan is arguably the first postindustrial society to embrace the prospect of human robot coexistence. Over the past decade, Japanese humanoid robots designed for use in homes, hospitals, offices, and schools have become celebrated in mass and social media throughout the world. In *Robo sapiens japonicus*, Jennifer Robertson casts a critical eye on press releases and public relations videos that misrepresent robots as being as versatile and agile as their science fiction counterparts. An ethnography and sociocultural history of governmental and academic discourse of human robot relations in Japan, this book explores how actual robots, humanoids, androids, and animaloids are imagineered in ways that reinforce the conventional sex/gender system and political/economic status quo. In addition, Robertson interrogates the notion of human exceptionalism as she considers whether civil rights should be granted to robots. Similarly, she juxtaposes how robots and robotic exoskeletons
