Ream, 2014-10-28 At the center of this book is the complex and perplexing question of how to design professional preparation programs organizational management practices public policy systems and robust professional associations committed to and capable of maintaining confidence trust and the other hallmarks of responsible professionalism To do this we need to rebuild our understanding of professional responsibility from the ground up We describe how individuals might be prepared to engage in responsible professional service delivery examine promising options for the reform of professional service systems and finally outline a reform strategy for improving practice in education and medicine two essential public services The nexus of the reform problem in professionalism is establishing a more robust and effective working relationship between teachers and their students between health care professionals and

their patients and between educators and health professionals Professionalism means acceptance of professional responsibility for student and patient outcomes not just acceptance of responsibility for technical expertise but commitment to the social norms of the profession including trustworthiness and responsibility for client wellbeing In the past it may have been sufficient to assume that adequate knowledge can be shaped into standards of professional practice Today it is clear that we must take careful account of the ways in which practicing professionals develop internalize and sustain professionalism during their training along with the ways in which this commitment to professionalism may be undermined by the regulatory fiscal technological political and emotional incentive systems that impinge on professional workplaces and professional employment systems
