Matters of Telling: The Impulse of the Story Carlo Comanducci, Alex Wilkinson, 2018-11-26 In this book multiple authors and perspectives converge on the materiality of storytelling in order to court its potentialities and flesh out its tensions Reflecting through its methodological multiplicity not only the vast array of discourses and disciplines that concern themselves with the study of narration but also the various and variable subjects of the act of telling the collective effort of this volume is less to map or track than to amplify the possibilities of contingent situations embodied relations and specific texts in which beyond the tale the telling itself speaks and matters **American Book Publishing Record**, 2003

Violence Alex Alvarez, Ronet D. Bachman, 2020-01-14 Violence The Enduring Problem offers an interdisciplinary and reader friendly exploration of the patterns and correlations of individual and collective violent acts using the most contemporary research theories and cases Responding to the fear of pervasive violence in the world authors Alex Alvarez and Ronet Bachman address the various legislative social and political efforts to curb violent behavior The authors expertly incorporate a wide range of current cases to help readers interpret the nature and dynamics of a variety of different yet connected forms of violence The Fourth Edition represents a significant step forward in presenting a more complete and contemporary analysis of violence Included in this edition is a new chapter on hate crime a new chapter devoted to multicide and updated discussions on current topical issues including the MeToo movement and epigenetics **Pictorial Law** Volker Boehme-Neßler, 2010-10-07 We live in a digital Media Society in which pictures are becoming more and more important So human communication is increasingly becoming a visual communication That is not a new finding But the new question is What does this development mean for the law Up to now the law is the part of the society which is most sceptical towards images Law has still resisted the visual temptation This will not last for ever The rush of pictures in everyday life and in every part of the society is much too strong and it is even getting stronger The invasion of images will change the character of modern law deeply Modern law will become a Pictorial Law What are the chances and the risks of Pictorial Law and visual

law communication This is the topic of the book **Developing Multicultural Educators** Jana Noel, 2017-12-21 Written in a narrative style with complex concepts and theories explained in everyday language and full of practical current examples this concise text asks educators to examine their identities It demonstrates how the social construction of identities has shaped individuals perceptions judgments and understanding of the world Noel integrates the right mix of personal experiences of multicultural educators literature from that field and information from the psychological philosophical and sociological foundations of education to help educators plan for diversity in their teaching Alongside up to date statistics and examples are timely discussions of immigration community involvement the achievement gap sex and gender hate crimes and bullying issues that touch multicultural educators on a daily basis Advantageous pedagogical tools group and individual activities guided discussion questions case studies and end of chapter reflective writings help readers gain a clear vision of how to be an effective teacher in today s diverse communities *White Men on Race* Joe R. Feagin, Eileen O'Brien, 2004-07-15 Based on the revealing and provocative testimony of approximately one hundred powerful upper income white men *White Men on Race* shows how white men see racial others how they see white America how they view racial conflicts and what they expect for the future of the country **The Hand of Compassion** Kristen Renwick Monroe, 2013-10-31 A fascinating treatise on moral psychology in depth interviews with five people who risked their lives to rescue Jews during World War II Publishers Weekly Through moving interviews with five ordinary people who rescued Jews during the Holocaust Kristen Monroe casts new light on a question at the heart of ethics Why do people risk their lives for strangers and what drives such moral choice Monroe s analysis points not to traditional explanations such as religion or reason but to identity The rescuers perceptions of themselves in relation to others made their extraordinary acts spontaneous and left the rescuers no choice but to act To turn away Jews was for them literally unimaginable In the words of one German Czech rescuer The hand of compassion was faster than the calculus of reason At the heart of this unusual book are interviews with the rescuers complex human beings from all parts of the Third Reich and all walks of life Margot a wealthy German who saved Jews while in exile in Holland Otto a German living in Prague who saved more than 100 Jews and provides surprising information about the plot to kill Hitler John a Dutchman on the Gestapo s Most Wanted List Irene a Polish student who hid eighteen Jews in the home of the German major for whom she was keeping house and Knud a Danish wartime policeman who took part in the extraordinary rescue of 85 percent of his country s Jews Monroe s analysis of these stories is a dramatic illumination of the power of identity to shape our most basic political acts including our treatment of others *Peace, Politics, and Religion* Jeffrey Haynes, 2020-12-14 Relationships between peace politics and religion are often controversial and sometimes problematic Religion is a core source of identity for billions of people around the world and it is hardly surprising that sometimes it becomes involved in conflicts At the same time we can see religion involved not only in conflict It is also central to conflict resolution peace making and peacebuilding Religious involvement is often necessary to try to end

hatred and differences frequently central to political conflicts especially but not only in the Global South Evidence shows that religious leaders and faith based organisations can play constructive roles in helping to end violence and in some cases build peace via early warnings of conflict good offices once conflict has erupted as well as advocacy mediation and reconciliation The chapters of this book highlight that religion can encourage both conflict and peace through the activities of people individually and collectively imbued with religious ideas and ideals

In Defence of Religious Schools and Colleges

Elmer John Thiessen, 2001 It is often argued that religious schools and colleges promote intolerance divisiveness and fanaticism and that they violate the principle of academic freedom Some writers also suggest that economic support for religious schools by the state violates the principle of the separation of church and state Elmer Thiessen provides a philosophical defence of religious schools and colleges against these and other standard objections He concludes with a radical proposal a pluralistic educational system will better prepare students for citizenship in pluralist liberal democracies than a monopolistic state maintained school system In placing his argument within the context of liberal democratic values Thiessen gives concrete examples of objections to religious schools and offers practical suggestions that follow from the philosophical treatment of the problem In Defence of Religious Schools and Colleges bridges the gap between philosophical argument and educational practice It will be of interest not only to philosophers and educational theorists but also to practitioners in education Academics policy makers political theorists lay people teachers administrators and parents B those who object to religious schools and colleges and those who find themselves trying to answer the objections B will benefit from reading this book

Why we need a revolution in the Social sciences: A post-colonial perspective

Sujay Rao Mandavilli, 2024-05-11 We began our work in right and in serious earnest in the year 2005 November 14th 2005 to be precise when children s day is celebrated all over India in commemoration of the birthday of Pandit Jawaharlal Nehru the first Prime Minister of India The underlying philosophy of our work however stretches back to the early 1990 s even the mid 1980 s when we faced a great deal of cognitive dissonance in many of our endeavours and daily walks of life due to a constant exposure to and a bombardment by a large number of philosophies and ideas from different sources both human and non human In the year 2005 particularly after the aforesaid date we had reached out to several leading lights and luminaries in the fields of science religion philosophy and spirituality with a great deal of hope to meaningfully engage with them and elicit their own pet theories proposals and viewpoints on various issues and topics We had hoped that this would also help us in our own voyage and journey of discovery The results were indeed startling there was a wide variation in viewpoints based on the scholar in question s own religious linguistic and nationalistic affiliation and loyalties Therefore the age of ideology has still not formally or conceptually ended ending this can change many fundamental equations at a grassroots level and can make life better for all of us living in different parts of the world As a matter of fact Eurocentric biases in various fields of the social sciences has only served to throw up counter reactions and exacerbate ideological differences Intellectualism is also

still weak in general particularly in developing countries particularly owing to the following factors Overcoming Bias Sue Ellen Christian, 2017-05-12 Journalists go out of their way to avoid purposeful bias in the news But there is a more pervasive set of internal biases and flaws in thinking that can lead to unintentional inaccuracies and distortions in news coverage This engaging book offers a fresh take on reporting without bias targeting the way that we categorize people filter information and default to rehearsed ways of thinking Included throughout are stories and on target advice from reporters and editors providing real world voices and experiences This advice and guidance is coupled with practical exercises that give readers the chance to apply what they learn Overcoming Bias will teach readers to edit their thinking for habitual errors making them more perceptive journalists It provides a career long foundation for challenging bias This is an ideal text for a course on multi cultural reporting or journalism ethics it may also be used as a supplement in any course on reporting and writing as each chapter deals with potential biases that emerge at each stage of the story process from story ideas to editing *The Ultimate Guide to the Top 100 Textbooks* Navneet Singh, Introduction Textbooks are the foundation of education providing in depth knowledge structured learning and essential references for students professionals and lifelong learners Whether you re studying physics mathematics history business or literature the right textbook can shape your understanding and mastery of a subject This guide highlights 100 of the most essential textbooks covering core academic disciplines technical fields and specialized subjects Whether you re a student educator or self learner these books will equip you with the knowledge you need to succeed
