Handbook of Social Care Work Around the World provides both a comprehensive and authoritative state of the art review of the current research in this subject. It is the first handbook to cover social care work research from around the world including both low and middle income countries as well as high income countries. Each of the 22 chapters are written by experts on long term care services particularly for older people and cover key issues and debates based on research evidence on social care work in a specific country. They look at perspectives of social care work from the macro level the structural conditions for long term care including demographic challenges and the long term care policy the meso level the level of provider organizations and intermediaries and the micro level views of care workers care users and unpaid informal carers. Furthermore they discuss a number of topics central to discussions of care work including marketization personalization policies policy implementation under austerity the provision of social care work whether through public services or private arrangements or mixed types funding the feminization of social care and the new role that technology and robots can play in care work. By drawing together leading scholars from around the world this book provides an up to the minute snapshot of current scholarship as well as signposting several fruitful avenues for future research. This book is both an invaluable resource for scholars and an indispensable teaching tool for use in the classroom and will be of interest to students academics social workers social policy makers and human service professionals.
