Strategic Help Seeking Stuart A. Karabenick,1998 Presents the current state of knowledge implications for teaching and learning and future directions for research on the issue of strategic help seeking in academic settings

Language, Literacy, and Learning in the STEM Disciplines Alison L. Bailey,Carolyn A. Maher,Louise C. Wilkinson,2018-02-01 With a focus on what mathematics and science educators need to know about academic language used in the STEM disciplines this book critically synthesizes the current knowledge base on language challenges inherent to learning mathematics and science with particular attention to the unique issues for English learners These key questions are addressed When and how do students develop mastery of the language registers unique to mathematics and to the sciences How do teachers use assessment as evidence of student learning for both accountability and instructional purposes Orienting each chapter with a research review and drawing out important Focus Points chapter authors examine the obstacles to and latest ideas for improving STEM literacy and discuss implications for future research and practice ENC Focus ,2000

Linking Science & Literacy in the K-8 Classroom Rowena Douglas,2006 **Teaching By Numbers** Peter Maas Taubman,2010-07 Taubman offers interdisciplinary ways to understand the educational reforms underway in urban education teaching and teacher education and their impact on what it means to teach He maps the totality of the transformation taking into account the constellation of forces shaping it and proposes an alternative vision of teacher education Research in Education ,1973 **Test-Enhanced Learning** Kristian Still,2023-05-13 Written by Kristian Still Test Enhanced Learning A practical guide to improving academic outcomes for all studentsis an informative guidebook that explores the wealth of evidence behind and the benefits of test enhanced learning spaced retrieval practice and personalisation Detailing the most up to date research into improving learning and retention it takes us on a journey into test enhanced learning spaced retrieval practice motivation metacognition and personalisation In so doing the book provides a blueprint for all teachers and schools to improve the academic outcomes of their students and to achieve this in ways that improve the motivation of learners and reduces the workload for teachers Kristian Still has been developing these ideas with

his classes for many years and has achieved considerable success in terms of the direct learning gains and improved assessment grades of his pupils and the indirect gains in students' growing confidence in lessons with a wider group of pupils contributing to class and improved classroom behaviour. Consequently, students are finding greater comfort in class and experiencing less pressure or underpreparedness when a question is asked. The book is supported by the free Remembermore app which uses digital flashcards as an aid to deliver the learning gains of personalised spaced retrieval practice, providing teachers with insights into the effectiveness of their own teaching. It also contains a number of practical case studies from teachers using these techniques and the app to produce great results in their schools. Spaced retrieval practice is a highly effective but counter-intuitive revision technique in that it involves forgetting and relearning knowledge. Test Enhanced Learning provides a blueprint for motivating students to adopt this technique in favour of seemingly easier but less effective techniques such as re-reading. Moreover, the Remembermore app does most of the convincing for you. It is a tool not only to provide the flashcards for retrieval practice but also to demonstrate the power of the technique to pupils. The book goes a step beyond mere retrieval practice, offering a fresh approach to test-enhanced learning, both pre-testing and post-testing, supported by real classroom-based routines that have been tried and tested by both Primary and Secondary teachers across a range of subjects. Exploring the research behind test-enhanced learning, it reveals that both pre-testing and post-testing retrieval practice offers improved memorisation and secures long-term learning. Suitable for all teachers in all settings.
