Condensed-Matter Physics National Research Council, Division on Engineering and Physical Sciences, Commission on Physical Sciences, Mathematics, and Applications, Board on Physics and Astronomy, Physics Survey Committee, Panel on Condensed-Matter Physics, 1986-02-01 *Nuclear Physics* Division on Engineering and Physical Sciences, Commission on Physical Sciences, Mathematics, and Applications, Board on Physics and Astronomy, Physics Survey Committee, Nuclear Physics Panel, 1986-02-01 **Atomic, Molecular, and Optical Physics** National Research Council, Division on Engineering and Physical Sciences, Commission on Physical Sciences, Mathematics, and Applications, Board on Physics and Astronomy, Physics Survey Committee, Panel on Atomic, Molecular, and Optical Physics, 1986-02-01 The goals of atomic molecular and optical physics AMO physics are to elucidate the fundamental laws of physics to understand the structure of matter and how matter evolves at the atomic and molecular levels to understand light in all its manifestations and to create new techniques and devices AMO physics provides theoretical and experimental methods and essential data to neighboring areas of science such as chemistry astrophysics condensed matter physics plasma physics surface science biology and medicine It contributes to the national security system and to the nation's programs in fusion directed energy and materials research Lasers and advanced technologies such as optical processing and laser isotope separation have been made possible by discoveries in AMO physics and the research underlies new industries such as fiber optics communications and laser assisted manufacturing These developments are expected to help the nation to maintain its industrial competitiveness and its military strength in the years to come This report describes the field characterizes recent advances and identifies current frontiers of research **Plasmas and Fluids** National Research Council, Division on Engineering and Physical Sciences, Commission on Physical Sciences, Mathematics, and Applications, Board on Physics and Astronomy, Physics Survey Committee, Panel on the Physics of Plasmas and Fluids, 1986-02-01 Implementing Reproducible Research Victoria Stodden, Friedrich Leisch, Roger D. Peng, 2018-12-14 In computational science reproducibility requires that researchers make code and data available to others so that the data can be analyzed in a similar manner as in the original publication Code must be available to be distributed data must be accessible in a readable format and a platform must be available for widely distributing the data and code In addition both data and code need to be licensed permissively enough so that others can reproduce the work without a substantial legal burden Implementing Reproducible Research covers many of the elements necessary for conducting and distributing reproducible research It explains how to accurately reproduce a scientific result Divided into three parts the book discusses the tools practices and dissemination platforms for ensuring reproducibility in computational science It describes Computational tools such as Sweave knitr VisTrails Sumatra CDE and the Declaratron system Open source practices good programming practices trends in open science and the role of cloud computing in reproducible research Software and methodological platforms including open source software packages RunMyCode

platform and open access journals Each part presents contributions from leaders who have developed software and other products that have advanced the field Supplementary material is available at www.ImplementingRR.org *Energy Research Abstracts*, 1989 *Calculating the Secrets of Life* National Research Council, Division on Engineering and Physical Sciences, Commission on Physical Sciences, Mathematics, and Applications, Committee on the Mathematical Sciences in Genome and Protein Structure Research, 1995-04-06 As researchers have pursued biology's secrets to the molecular level mathematical and computer sciences have played an increasingly important role in genome mapping population genetics and even the controversial search for Eve hypothetical mother of the human race In this first ever survey of the partnership between the two fields leading experts look at how mathematical research and methods have made possible important discoveries in biology The volume explores how differential geometry topology and differential mechanics have allowed researchers to wind and unwind DNA's double helix to understand the phenomenon of supercoiling It explains how mathematical tools are revealing the workings of enzymes and proteins And it describes how mathematicians are detecting echoes from the origin of life by applying stochastic and statistical theory to the study of DNA sequences This informative and motivational book will be of interest to researchers research administrators and educators and students in mathematics computer sciences and biology Plasma Science National Research Council, Division on Engineering and Physical Sciences, Board on Physics and Astronomy, Plasma Science Committee, Panel on Opportunities in Plasma Science and Technology, 1995-02-01 Plasma science is the study of ionized states of matter This book discusses the field's potential contributions to society and recommends actions that would optimize those contributions It includes an assessment of the field's scientific and technological status as well as a discussion of broad themes such as fundamental plasma experiments theoretical and computational plasma research and plasma science education **Mathematics and Physics of Emerging Biomedical Imaging** National Research Council, Division on Engineering and Physical Sciences, Commission on Physical Sciences, Mathematics, and Applications, Committee on the Mathematics and Physics of Emerging Dynamic Biomedical Imaging, 1996-02-28 This cross disciplinary book documents the key research challenges in the mathematical sciences and physics that could enable the economical development of novel biomedical imaging devices It is hoped that the infusion of new insights from mathematical scientists and physicists will accelerate progress in imaging Incorporating input from dozens of biomedical researchers who described what they perceived as key open problems of imaging that are amenable to attack by mathematical scientists and physicists this book introduces the frontiers of biomedical imaging especially the imaging of dynamic physiological functions to the educated nonspecialist Ten imaging modalities are covered from the well established e g CAT scanning MRI to the more speculative e g electrical and magnetic source imaging For each modality mathematics and physics research challenges are identified and a short list of suggested reading offered Two additional chapters offer visions of the next generation of surgical and interventional techniques and of image processing A final chapter provides an overview

of mathematical issues that cut across the various modalities Elementary-Particle Physics National Research Council, Division on Engineering and Physical Sciences, Commission on Physical Sciences, Mathematics, and Applications, Board on Physics and Astronomy, Physics Survey Committee, Elementary-Particle Physics Panel, 1986-02-01 Part of the Physics in a New Era series of assessments of the various branches of the field Elementary Particle Physics reviews progress in the field over the past 10 years and recommends actions needed to address the key questions that remain unanswered It explains in simple terms the present picture of how matter is constructed As physicists have probed ever deeper into the structure of matter they have begun to explore one of the most fundamental questions that one can ask about the universe What gives matter its mass A new international accelerator to be built at the European laboratory CERN will begin to explore some of the mechanisms proposed to give matter its heft The committee recommends full U S participation in this project as well as various other experiments and studies to be carried out now and in the longer term

Twenty-Second Symposium on Naval Hydrodynamics National Research Council, Naval Surface Warfare Center, Carderock Division, Office of Naval Research, Division on Engineering and Physical Sciences, Commission on Physical Sciences, Mathematics, and Applications, Naval Studies Board, 2000-03-02 The Twenty Second Symposium on Naval Hydrodynamics was held in Washington D C from August 9 14 1998 It coincided with the 100th anniversary of the David Taylor Model Basin This international symposium was organized jointly by the Office of Naval Research Mechanics and Energy Conversion S T Division the National Research Council Naval Studies Board and the Naval Surface Warfare Center Carderock Division David Taylor Model Basin This biennial symposium promotes the technical exchange of naval research developments of common interest to all the countries of the world The forum encourages both formal and informal discussion of the presented papers and the occasion provides an opportunity for direct communication between international peers
