History of Operations Research in the United States Army, V. 1, 1942-1962 Charles R. Shrader,2006-10-05 Operations research OR emerged during World War II as an important means of assisting civilian and military leaders in making scientifically sound improvements in the design and performance of weapons and equipment OR techniques were soon extended to address questions of tactics and strategy during the war and after the war to matters of high level political and economic policy Until now the story of why and how the U S Army used OR has remained relatively obscure surviving only in a few scattered official documents in the memories of those who participated and in a number of notes and articles that have been published about selected topics on military operations research However none of those materials amounts to a comprehensive coherent history In this the first of three planned volumes Dr Charles R Shrader has for the first time drawn together the scattered threads and woven them into a well focused historical narrative that describes the evolution of OR in the U S Army from its origins in World War II to the early 1960s He has done an admirable job of ferreting out the surviving evidence shaping it into an understandable narrative and placing it within the context of the overall development of American military institutions Often working with only sparse and incomplete materials he has managed to provide a comprehensive history of OR in the U S Army that offers important insights into the natural tension between military leaders and civilian scientists the establishment and growth of Army OR organizations the use and abuse of OR techniques and of course the many important contributions that OR managers and analysts have made to the growth and improvement of the Army since 1942 In this volume Dr Shrader carries the story up to 1962 the beginning of the McNamara era and of America's long involvement in Vietnam The subsequent volumes will cover Army OR during the McNamara era its application in support of military operations in Vietnam and its significant contributions to the Army's post Vietnam recovery and reorganization ultimately leading to a victory after only 100 hours of combat in the first Gulf War in 1991 and the emergence of the U S Army as second to none in modern weaponry tactical prowess and strategic vision History of Operations Research in the United States Army Charles R. Shrader,2006 History of Operations Research in the United States Army a comprehensive 3 volume set with each volume covering a different time span offers insights into the natural tension between military leaders and civilian scientists the establishment and growth of Army Operations Research OR organizations the use of OR techniques and the many contributions that OR managers and analysts have made to the growth and improvement of the Army since 1942 Faculty and Staff Reprints Naval Postgraduate School (U.S.),1965 *University City* Laura Wolf-Powers,2022-09-20 A chronicle of neighborhood redevelopment politics in West Philadelphia over 60 years In twenty first century American cities policy makers increasingly celebrate university sponsored innovation districts as engines of inclusive growth But the story is not so simple In *University City* Laura Wolf Powers chronicles five decades of planning in

and around the communities of West Philadelphia's University City to illuminate how the dynamics of innovation district development in the present both depart from and connect to the politics of mid twentieth century urban renewal Drawing on archival and ethnographic research Wolf Powers concludes that even as university and government leaders vow to develop without displacement what existing residents value is imperiled when innovation driven redevelopment remains accountable to the property market The book first traces the municipal and institutional politics that empowered officials to demolish a predominantly Black neighborhood near the University of Pennsylvania and Drexel University in the late 1960s to make way for the University City Science Center and University City High School It also provides new insight into organizations whose members experimented during that same period with alternative conceptions of economic advancement The book then shifts to the present documenting contemporary efforts to position university adjacent neighborhoods as locations for prosperity built on scientific knowledge Wolf Powers examines the work of mobilized civic groups to push cultural preservation concerns into the public arena and to win policies to help economically insecure families keep a foothold in changing neighborhoods Placing Philadelphia's innovation districts in the context of similar development taking place around the United States University City advocates a reorientation of redevelopment practice around the recognition that despite their negligible worth in real estate terms the time care and energy people invest in their local environments and in one another are precious urban resources Pictured on the book's cover is a luncheon on Melon Street between 37th and 38th Streets in West Philadelphia May 31 2014 The community meal was part of Funeral for a Home a project that honored the life and passing of a house at 3711 Melon Street in Mantua Photo by Jeffrey Stockbridge Funeral for a Home was commissioned by Temple Contemporary Temple University Original support for Funeral for a Home was provided by The Pew Center for Arts Heritage Philadelphia
