Directions in Agrarian Political Economy Ryan Isakson,2017-10-02 How relevant are the classic theories of agrarian change in the contemporary context This volume explores this question by focusing upon the defining features of agrarian transformation in the 21st century the financialization of food and agriculture the blurring of rural and urban livelihoods through migration and other economic activities forest transition climate change rural indebtedness the co evolution of social policy and moral economies and changing property relations Combined the eleven contributions to this collection provide a broad overview of agrarian studies over the past four decades and identify the contemporary frontiers of agrarian political economy In this path breaking collection the authors show how new iterations of long evident processes continue to catch peasants and smallholders in the crosshairs of crises and how many manage to face these challenges developing new sources and sites of livelihood production This volume was published as part one of the special double issue celebrating the 40th anniversary of the Journal of Peasant Studies **Psychosocial Perspectives on Peacebuilding** Brandon Hamber,Elizabeth Gallagher,2014-11-04 The book Psychosocial Perspectives on Peacebuilding offers a template for those dealing with the aftermath of armed conflict to look at peacebuilding through a psychosocial lens This Volume and the case studies that are in it starts from the premise that armed conflict and the political violence that flows from it are deeply contextual and that in dealing with the impact of armed conflict context matters The book argues for a conceptual shift in which psychosocial practices are not merely about treating individuals and groups with context and culturally sensitive methods and approaches the contributors argue that such interventions and practices should in themselves shape social change This is of critical importance because the psychosocial method continually highlights how the social context is one of the primary causes of individual psychological distress The chapters in this book describe experiences within very different contexts including Guatemala Jerusalem Indian Kashmir Mozambique Northern Ireland South Africa and Sri Lanka The common thread between the case studies is that they each show how psychosocial interventions and practices can influence the peacebuilding environment and foster wider social change Psychosocial Perspectives on Peacebuilding is essential reading for social and peace psychologists as well as for students and researchers in the field of conflict and peace studies and for psychosocial practitioners and those working in post conflict areas for NGO s **Crowdfunding and Entrepreneurial Finance** Richard Harrison,2017-10-02 An increase in the restrictions on the availability of funding for new and growing businesses in the aftermath of the global financial crisis has been accompanied by the emergence and growth of crowdfunding as an alternative method of raising capital Crowdfunding contributes towards the disintermediation of the finance market as funders and promoters are brought together directly democratising both fundraising by businesses and investment by individuals This book extends entrepreneurial finance research to the study of crowdfunding Contributions review the history

status and future of crowdfunding analyse the patterns of fundraising assess the potential of crowdfunding for the financing of social ventures in particular and discuss the regulatory implications of recent developments What is clear from this collection is that the crowdfunding space is still evolving institutional forms are still developing as models are refined new institutional collaborations e g between equity platforms and business angel networks are emerging and new challenges particularly regulatory challenges are being encountered While crowdfunding is not a universal solution for SME finance in a post crisis financial landscape it remains too early to determine whether crowdfunding represents a large scale transformation of the early stage risk capital market or a minor addition to it This book was originally published as a special issue of Venture Capital

The Road to Unfreedom Timothy

Snyder, 2019-04-09 NEW YORK TIMES BESTSELLER From the author of *On Tyranny* comes a stunning new chronicle of the rise of authoritarianism from Russia to Europe and America A brilliant analysis of our time Karl Ove Knausgaard *The New Yorker* With the end of the Cold War the victory of liberal democracy seemed final Observers declared the end of history confident in a peaceful globalized future This faith was misplaced Authoritarianism returned to Russia as Vladimir Putin found fascist ideas that could be used to justify rule by the wealthy In the 2010s it has spread from east to west aided by Russian warfare in Ukraine and cyberwar in Europe and the United States Russia found allies among nationalists oligarchs and radicals everywhere and its drive to dissolve Western institutions states and values found resonance within the West itself The rise of populism the British vote against the EU and the election of Donald Trump were all Russian goals but their achievement reveals the vulnerability of Western societies In this forceful and unsparing work of contemporary history based on vast research as well as personal reporting Snyder goes beyond the headlines to expose the true nature of the threat to democracy and law To understand the challenge is to see and perhaps renew the fundamental political virtues offered by tradition and demanded by the future By revealing the stark choices before us between equality or oligarchy individuality or totality truth and falsehood Snyder restores our understanding of the basis of our way of life offering a way forward in a time of terrible uncertainty

Routledge Handbook of Environmental Displacement and Migration Robert McLeman, François Gemenne, 2018-03-09 The last twenty years have seen a rapid increase in scholarly activity and publications dedicated to

environmental migration and displacement and the field has now reached a point in terms of profile complexity and sheer volume of reporting that a general review and assessment of existing knowledge and future research priorities is warranted. So far such a product does not exist. The Routledge Handbook of Environmental Displacement and Migration provides a state of the science review of research on how environmental variability and change influence current and future global migration patterns and in some instances trigger large scale population displacements. Drawing together contributions from leading researchers in the field, this compendium will become a go to guide for established and newly interested scholars, for government and policymaking entities and for students and their instructors. It explains theoretical, conceptual and empirical developments that have been made in recent years, describes their origins and connections to broader topics including migration research, development studies and international public policy and law, and highlights emerging areas where new and/or additional research and reflection are warranted. The structure and the nature of the book allow the reader to quickly find a concise review relevant to conducting research or developing policy on particular topics and to obtain a broad, reliable survey of what is presently known about the subject.

Incomplete Streets Stephen Zavestoski, Julian Agyeman, 2014-08-27. The Complete Streets concept and movement in urban planning and policy has been hailed by many as a revolution that aims to challenge the auto normative paradigm by reversing the broader effects of an urban form shaped by the logic of keeping automobiles moving. By enabling safe access for all users, Complete Streets promise to make cities more walkable and livable and at the same time more sustainable. This book problematizes the Complete Streets concept by suggesting that streets should not be thought of as merely physical spaces but as symbolic and social spaces. When important social and symbolic narratives are missing from the discourse and practice of Complete Streets, what actually results are incomplete streets. The volume questions whether the ways in which complete streets narratives, policies, plans and efforts are envisioned and implemented might be systematically reproducing many of the urban spatial and social inequalities and injustices that have characterized cities for the last century or more. From critiques of a mobility bias rooted in the neoliberal foundations of the Complete Streets concept to concerns about resulting environmental gentrification, the chapters in *Incomplete Streets* variously call for planning processes that give voice to the historically marginalized and more broadly that approach streets as dynamic, fluid and public social places. This interdisciplinary book is aimed at students, researchers and professionals in the

fields of urban geography environmental studies urban planning and policy transportation planning and urban sociology

Albert Rorabacher, 2016-09-13 The world has become obsessed with the Western notions of progress development and globalization the latter a form of human and economic homogenization These processes through the aegis of the United Nations are comparatively monitored Those nations deemed to be lagging behind are then provided with foreign aid and developmental assistance For nearly seventy years India has sought its place in this global endeavour yet even today abject poverty and backwardness can be observed in districts in almost every state with the highest concentration of such districts found in the state of Bihar and a cultural enclave known as Mithila Development in India has been elusive because it is difficult to define and because the Western concepts of development and progress have no absolute equivalents within many non Western settings As a consequence development programmes often fail because they are unable to ask the right questions but equally important is the political economy derived from foreign aid For politicians there is no long term benefit to be derived from successful development In general foreign aid only serves to corrupt governments and politicians and in the end does very little for those who need help The struggling states of Bihar and Mithila serve as extreme examples of India s problems Development here has been thwarted by a hereditary landed aristocracy supported by religion casteism custom social stratification tradition and patterns of behaviour that can be traced back millennia In turn all these have been masterfully manipulated by co opted politicians who have turned politics into a veritable art form as this volume comprehensively demonstrates **Understanding New Security Threats** Michel Gueldry, Gigi Gokcek, Lui Hebron, 2019-02-21 This textbook examines non traditional forms of security and expands the notion of security to include non state actors and non human actors Proposing an expansive view of non traditional forms of security that go beyond traditionally recognized issues of threats to state and national territory this new textbook rests on the following premises traditional state centered threats such as nuclear proliferation and espionage

remain a concern old and new threats combine and create interlocking puzzles a feature of wicked problems and wicked messes because of the global erosion of borders new developments of unconventional insecurity interact in ways that frustrate traditional conceptual definitions conceptual maps and national policies unconventional security challenges which have traditionally been seen as low politics or soft issues are now being recognized as hard security challenges in the twenty first century many of the so called new threats detailed here are in fact very old diseases gender violence food insecurity under development and crime are all traditional security threats but deeply modified today by globalization The chapters offer local and global examples and engage with various theoretical approaches to help readers see the bigger picture Solutions are also suggested to these problems Each chapter contains discussion questions to help readers understand the key points and facilitate class discussion This book will be of great interest to students of international security studies human security global politics and international relations *Human Rights and 21st Century Challenges* Dapo
