

Quality Manual

SECTION 7. PRODUCT REALIZATION

7.1 PLANNING OF PRODUCT REALIZATION NRC will plan and develop the processes needed for product realization. Planning of product realization will be consistent with the requirements of the other processes of the quality management system (see 4.1). In planning product realization, NRC will determine the following, as appropriate per the requirements of written procedures:

- a) Quality objectives and requirements for the product,
- b) The need to establish processes, documents, and provide resources specific to the product or service,
- c) Required verification, validation, monitoring, and inspection & test activities specific to the product and the criteria for product acceptance,
- d) Records needed to provide evidence that the realization processes and resulting product meet requirements (see 4.2.4).

1.0.0 The output of this planning will be in a form suitable for NRC's method of operations.

7.2 CUSTOMER RELATED PROCESSES

7.2.1 Determination of Requirements Related to the Product

NRC will determine:

- a) Requirements specified by the customer, including the requirements for delivery and post-delivery activities,
- b) Requirements not stated by the customer but necessary for specified or intended use, where known,
- c) Statutory and regulatory requirements (if applicable) related to the product, and
- d) Any additional requirements determined by NRC

7.2.1.1 Supporting Procedures The following procedures provide additional detail for methods, responsibilities, and documentation related to Contract Review. **OP-5: Contract Review**

Tannock,2012-12-06 Quality is a topical issue in manufacturing Competitive quality performance still eludes many manufacturers in the traditional industrialized countries A lack of quality competitiveness is one of the root causes of the relative industrial decline and consequent trade imbalances which plague some Western economies Many explanations are advanced for poor quality

performance Inadequate levels of investment in advanced technology together with insufficient education and training of the workforce are perhaps the most prominent Some believe these problems are caused by a lack of awareness and commitment from top management while others point to differences between industrial cultures The established remedy is known as Total Quality Management TQM TQM requires a corporate culture change driven from the top and involving every employee in a process of never ending quality improvement aimed at internal as well as external customers The techniques deployed to achieve TQM include measures to improve motivation training in problem solving and statistical process control SPC Quality is however only one of the competitive pressures placed It is also upon the manufacturer by the modern global economy imperative to remain economical and efficient while increasing the flexibility and responsiveness of the design and manufacturing functions Here the reduction or elimination of stock is of great importance particularly as financial interest rates in the less successful manufacturing nations are frequently high Product life cycles must become ever more compressed in response to the phenomenal design to manufacture performance of some Pacific rim economies Country Guide and Nor'west Farmer ,1928 The Index Buyers' Guide to the Best Markets for Hardware, Ironmongery, Tools ... ,1929 **Quality Technology Handbook** R S Sharpe,J West,D S Dean,2017-03-28 Quality Technology Handbook Fourth Edition offers a wide discussion on technology and its related subtopics After giving some information on its background content and authors the book then informs the readers about the quality problem check list and enumerates the questions one has to ask to ensure that a problem will be solved This part is followed by a discussion on non destructive testing NDT and the several committees formed for it among which are the British National Committee and the Harwell NDT Center The book also includes information on two organizations that are closely related to the topic the Institute of Quality Assurance IQA and The Welding Institute TWI A directory of international organizations related to quality assurance and non destructive testing is provided in the latter part of the text The book serves as valuable reference to undergraduates or postgraduates of courses that are related to science and technology **Title List of Documents Made Publicly Available** U.S. Nuclear Regulatory Commission,1986 **Rubbercon '87** ,1987
