Rubric For Urban And Rural Communities:

Urban Development in China under the Institution of Land Rights Jieming Zhu, 2019-09-17 How have the development and redevelopment of China's cities since the early 1950s transformed the settlements and fortunes of a fifth of the world's population? Rapid urbanization since the 1980s has changed the nation from a rural society to an urban one, marking it as one of the most significant transformations in history. As a country with severe land scarcity, land resources are intensively contested for during urbanization under the new regime of marketization. This book focuses on the impact of the institution of land rights that have transitioned from private ownership to socialist state ownership and subsequently to public land leasing in the urban domain and to collective ownership in rural areas. In the context of defining the relationship between the state and the market, the gradualist transition of land rights gives rise to intriguing processes of place making. The elaboration of these processes will engage several revealing conceptual notions: land as a means of production, land commodification, ambiguous land rights, incomplete land rights trading, land use rights for land development rights, institutional uncertainty, land rent seeking and dissipating, local developmental state, danwei enterprises and more. The newly created landed interests are embedded intricately within the urban spatial structure. This book would especially be of interest to scholars interested in developmental economics, urban planning, geography, public policies, public management and sociology, and also practitioners focusing on development and planning.

Rubric Nation Michelle Tenam-Zemach, Joseph E. Flynn, 2015-04-01 What is a rubric and how are they being used in teacher education and evaluation? When did rubrics become ubiquitous in the field of education? What impact do rubrics have on students, teachers, teacher educators and the educational enterprise? This book is an edited volume of essays that critically examine the phenomenon of rubrics in teacher education, evaluation and education more broadly. Rubrics have seen a dramatic rise in use and presence over the past twenty-five years in colleges of education and districts across the country. Although there is a wealth of literature about how to make rubrics, there is scant literature that explores the strengths and weaknesses of rubrics and the impact the rubric phenomenon is having in reshaping education. The chapters included in this edited volume will critically reflect on the contemporary contexts of rubrics and the uses and impact of rubrics in education. Since rubrics have become indelible in education, it is necessary for a fuller nuanced discussion of the phenomenon. Creating a book that explores these aspects of rubrics is timely and fundamental to expanding the discourse on this ubiquitous evaluation tool. This book is not meant to be a series of chapters dedicated to best practices for creating rubrics, nor is this text meant to present all sides of the rubric discussion. Rather, this text intends to offer critical polemics about rubrics that can spur greater critical discussion about a phenomenon in education that has largely been unquestioned in the literature.

spatial patterning of humans and the environment This interaction results as well in the unprecedented importance of boundaries and borders transnational border issues pose both opportunities and threats to global conservation proposed by organizations and institutions that are themselves international Lastly Globalization and New Geographies of Conservation argues that the local level has been integral to globalization while the regional level is often eclipsed at the peril of the successful implementation of conservation and management programs Bridging the gap between geography and life science Globalization and New Geographies of Conservation will appeal to a broad range of students of the environment conservation planning biodiversity management and development and globalization studies Citizen Science for Future Generations
