discusses the essentials of educational statistics that will help educational practitioners to do this part of their job properly i.e. without making conceptual mistakes. The examples are cast in the school classroom contexts based on realistic rather than theoretical examples. The strongest aspect of the work or author's view is that the author can put himself in the shoes of teachers and make the work a very practical guide for teachers and school leaders. As a very experienced educator and researcher, the author knows very well about the knowledge skills that are essential for the professional development of teachers. He is able to explain the statistical and measurement concepts in plain language and with examples that are highly relevant to the target audience. In addition, the author also conveyed an important message to the target audience throughout the work by pointing out the mistakes and misunderstandings of the interpretation of test scores and measurement design. The author reminds the audience about the importance of proper use of tests and test scores when teachers and school leaders make any education decisions, which has much implication on the professional integrity of teachers and school leaders.

Dr Joyce Kwan, The Education University of Hong Kong, Hong Kong. This book covers all the statistical tools for analyzing educational data and provides examples to explain the ideas. Chapters 10-17 are practical data analysis in educational data that helps readers have a better understanding of the procedure to analyze the data.

Dr Alpha Ling, The Education University of Hong Kong, Hong Kong. It looks like a very interesting book with attractive topics and practical problems in educational statistics. Though the topics remind me of the classic book *How to Lie with Statistics*, this book aims at preventing and correcting statistical misconceptions in educational context.

Dr Zhu Ying, National Institute of Education, Nanyang Technological University, Singapore.

Governance for Harmony in Asia and Beyond Julia Tao, Anthony B. L. Cheung, Martin Painter, Chenyang Li, 2009-12-18. Harmony has become a major challenge for modern governance in the twenty-first century because of the multi-religious, multi-racial, and multi-ethnic character of our increasingly globalized societies. Governments all over the world are facing growing pressure to integrate the many diverse elements and subcultures which make up modern pluralistic societies. This book examines the idea of harmony and its place in politics and governance both in theory and practice in Asia, the West, and elsewhere. It explores and analyses the meanings, mechanisms, dimensions, and methodologies of harmony as a normative political ideal in both Western and Asian philosophical traditions. The book argues that in Western political thought, which sees politics as primarily concerned with resolving social conflicts and protecting individual rights, the concept of harmony has often been neglected. In contrast, since earliest times, harmony or *he* has been a profound theme in Confucian thought, and current leaders of many East Asian governments and the Chinese government have explicitly declared that the realisation of a harmonious society is their aim. The book also assesses how harmony is pursued, jeopardized, or deformed in the real world of politics based upon empirical analysis of a variety of different cultural, social, and political contexts, including China, Hong Kong, Singapore, Malaysia, Singapore, Vietnam, Denmark, Latin America, and the Scandinavian countries. It shows how harmony as an organizing concept can help to promote new

thinking in governance and overcome problems of modern day governance like distrust adversarial conflicts hyper individualism coercive state intervention and free market alienation It also discusses the potential problems posed by the pursuit of harmony in particular in the grave threat of totalitarianism and considers how these risks could best be mitigated

Innovative Pedagogy in Chinese Language Education Fangqiong Zhan, Guat Poh Aw, 2025-07-30 This book reflects on the Chinese education context in Singapore addressing the challenges of the Chinese language education system exploring innovative and efficient language teaching approaches and proposing new directions for Chinese education in Singapore It explores Chinese education in the Singapore bilingual context in terms of language policy sociolinguistics cultural integration and pedagogical practice as well as providing a blueprint of Singapore s Chinese education for the future It presents chapters from Singaporean scholars who are mostly from the department of Asian Language and Culture and the Office of Education Research in the National Institute of Education at Nanyang Technological University This book examines the following topics the sociolinguistic landscape beyond China and the positioning of Chinese in Singapore pedagogical practices and methodologies in Singapore s bilingual education context and Chinese textbooks and teaching materials in Singapore This book serves as a useful reference for readers interested in language policy and Chinese education internationally for educators who encounter similar challenges in language education and for policy makers who aim to fine tune current policies to be more comprehensive and effective

The administration of examinations for 15-19 year olds in England Great Britain: Parliament: House of Commons: Education Committee, 2012-07-03 This report from the Education Committee looks at the administration of examinations for 15 19 year olds in England The Committee expresses serious concerns about incentives in the exam system and about competition on syllabus content Incentives in the system should be changed so the downward pressure through the competition of exam boards is mitigated The Committee considers

a number of options to change incentives including i A single board This offers a simpler system with no risk of competition but the Committee believes the cost risk and disruption outweigh the benefits ii Franchising of subjects to exam boards This removes syllabus competition but again has downsides 3 Or the current system of multiple boards The Committee sees no benefit in competition on syllabus content but the setting and marking of exams and associated administration if properly regulated could generate incentives and drive quality up offering value for money to schools and colleges The Committee also recommends the development of national syllabuses accredited by Ofqual The syllabuses would be developed by exam boards in conjunction with learned bodies and employer organisations and could therefore retain the benefits of competition on quality and the incentive for exam boards to innovate **How the Great Spirit Shaped My Life** Tommy S. In today's uncertain world few beliefs remain as firmly entrenched as the optimistic view that more schooling will lead to a better life Though this may be true in the aggregate how do we explain the circumstances when schooling fails to produce certainty or even does us harm Schooling as Uncertainty addresses this question by combining ethnography and memoir as it guides readers on a 30 year journey through fieldwork and familyhood in Tanzania and academic life in the USA Using reflexive longitudinal ethnographic research the book examines how African youth particularly young women employ schooling in an attempt to counter the uncertainties of marriage child rearing employment and HIV AIDS Adopting a narrative approach Vavrus tells the story of how her life became entangled with a community on Mount Kilimanjaro and how she and they sought greater security through schooling and to varying degrees succeeded
