

Stoichiometry questions (1)

Consider : $4\text{NH}_3 + 5\text{O}_2 \rightarrow 6\text{H}_2\text{O} + 4\text{NO}$

- How many moles of H_2O are produced if 0.176 mol of O_2 are used?

$$\# \text{ mol H}_2\text{O} = 0.176 \cancel{\text{ mol O}_2} \times \frac{6 \text{ mol H}_2\text{O}}{5 \cancel{\text{ mol O}_2}} = 0.2112 \text{ mol}$$

- How many moles of NO are produced in the reaction if 17 mol of H_2O are also produced?

$$\# \text{ mol NO} = 17 \cancel{\text{ mol H}_2\text{O}} \times \frac{4 \text{ mol NO}}{6 \cancel{\text{ mol H}_2\text{O}}} = 11.33 \text{ mol NO}$$

Notice that a correctly balanced equation is essential to get the right answer

Multiple Representations in Chemical Education John K. Gilbert,David Treagust,2009-02-28 Chemistry seeks to provide qualitative and quantitative explanations for the observed behaviour of elements and their compounds Doing so involves making use of three types of representation the macro the empirical properties of substances the sub micro the natures of the entities giving rise to those properties and the symbolic the number of entities involved in any changes that take place Although understanding this triplet relationship is a key aspect of chemical education there is considerable evidence that students find

great difficulty in achieving mastery of the ideas involved In bringing together the work of leading chemistry educators who are researching the triplet relationship at the secondary and university levels the book discusses the learning involved the problems that students encounter and successful approaches to teaching Based on the reported research the editors argue for a coherent model for understanding the triplet relationship in chemical education **Cracking the SAT Chemistry Subject Test** Princeton Review,2014-12-09 EVERYTHING YOU NEED TO HELP SCORE A PERFECT 800 Equip yourself to ace the SAT Chemistry Subject Test with The Princeton Review s comprehensive study guide including 3 full length practice tests thorough reviews of key chemistry topics and targeted strategies for every question type We don t have to tell you how tough SAT Chemistry is or how helpful a stellar exam score can be for your chances of getting into your top choice college Written by the experts at The Princeton Review **Cracking the SAT Chemistry Subject Test** arms you to take on the test and achieve your highest score Techniques That Actually Work Tried and true strategies to help you avoid traps and beat the test Tips for pacing yourself and guessing logically Essential tactics to help you work smarter not harder Everything You Need to Know for a High Score Expert subject reviews for every test topic Up to date information on the SAT Chemistry Subject Test Score conversion tables for accurate self assessment Practice Your Way to Perfection 3 full length practice tests with detailed answer explanations Hands on experience with all three question types in each content chapter Complete study sheet of core formulas and terms **Cracking the SAT Chemistry Subject Test, 15th Edition** Princeton Review,2015-02-17

SCIENCE EXAM(2011 EDITION) Princeton Review,2011-03-08 Reviews topics covered on the test offers tips on test taking strategies and includes two full length practice tests with answers and explanations *Moving Questions* Joseph D Robinson,2013-05-27 This book describes a half century of research on cellular membrane transport and on metabolic energy capture and utilization During this time which begins in the late 1930s the effort and imagination of various scientists overthrew reigning formulations created novel explanatory models and unified previously distinct experimental fields My primary goal is to display the course of that research showing how new experiments defined novel entities and processes and how an encompassing field bioenergetics then emerged A secondary goal is to present examples of mainstream biological research that illustrate how experimental results seen as refutations confirmations and elaborations can sway opinion toward a solid consensus This interpretation differs from the currently fashionable view of some commentators that stresses instead the central roles of power prestige gender class and ethnicity In any case the scientific practices exhibited here deserve proper philosophical scrutiny Although constraints of space have squeezed any analysis from this draft brief mention of salient issues does appear in relevant chapters and in the final conclusions Oddly historians and philosophers seem reluctant to deal with this science Those who do consider biological topics tend to focus on the theory of evolution even though the bulk of biological research in this century in terms of papers published and technology influenced has dealt not with evolution per se but with what may be termed physiology and biochemistry And these endeavors which are the aims efforts and accomplishments of the vast majority of biologists have been largely ignored

Digital Learning and Teaching in Chemistry Yehudit Dori,Courtney Ngai,Gabriela Szteinberg,2023-07-12 Education is always evolving and most recently has shifted to increased online or remote learning Digital Learning and Teaching in Chemistry compiles the established and emerging trends in this field specifically within the context of learning and teaching in chemistry This book shares insights about five major themes best practices for teaching and learning digitally digital learning platforms virtual visualisation and laboratory to promote learning in science digital assessment and building communities of learners and educators The authors are chemistry instructors and researchers from nine countries contributing an international perspective on digital learning and teaching in chemistry While the chapters in this book span a wide variety of topics as a whole they focus on using technology and digital platforms as a method for supporting inclusive and meaningful learning The best practices and recommendations shared by the authors are highly relevant for modern chemistry education as teaching and learning through digital methods is likely to persist Furthermore teaching chemistry digitally has the potential to bring greater equity to the field of chemistry education in terms of who has access to quality learning and this book will contribute to that goal This book will be essential reading for those working in chemical education and teaching Yehudit Judy Dori is internationally recognised formerly Dean of the Faculty of Education of Science and Technology at the Technion Israel Institute of Technology and won the 2020 NARST Distinguished Contributions to Science Education through Research Award
