Handwriting Jean Alston,Jane Taylor dec'd,2024-11-01 First Published in 1987 Handwriting reviews theory and research on handwriting and on children who have handwriting problems and draws out principles and recommendations for practitioners The practitioners will include teachers educational advisors psychologists and occupational and physical therapists There has been a revival in the teaching of the basic school skills of reading writing and number Surprisingly however there are very few books concerning the manipulative skills of handwriting and this book seeks to fill this major gap While much of the book is concerned with the development and teaching of handwriting skills in ordinary children it also gives detailed consideration to the problems encountered by children with physical disabilities This is an interesting read for students of education

Dyslexia, Speech and Language Margaret J. Snowling,Joy Stackhouse,2013-05-21 This authoritative handbook presents current ideas on the relationship between spoken and written language difficulties It provides clinical and educational perspectives on the assessment and management of children s reading and spelling problems The book begins with a theoretical overview The second edition continues the theme of linking theory and practice It is aimed at practitioners in the fields of education speech and language therapy and psychology All original chapters have been updated and new chapters are added to reflect current developments

Developing School Provision for Children with Dyspraxia Nichola Jones,2005-10-03 A wealth of ideas and opinions providing usable ways forward for colleagues in mainstream to best support their pupils with DCD I can wholeheartedly recommend it Afasic News This book has pulled together the expertise of a number of well known professionals We like the way Nichola Jones sets the

scene and outlines the child's main difficulties in the education environment. This is a very practical book offering plenty of ideas in an area where teachers often have less confidence to put a programme in place. SATIPS: This is an accessible overview of issues pertaining to the inclusion of children and young people with Dyspraxia, developmental coordination disorder (DCD). Nichola Jones has drawn together contributions from a wider range of experts in the Dyspraxia field and produced a coherent account of how the needs of children can be met in ways that move beyond a focus solely based on individual interventions. SENCO Update: This is both an interesting and very useful book for any primary practitioner. It also provides enough references and ideas to encourage professionals to investigate and learn more about Dyspraxia, developmental coordination disorder. This is a book that will fit perfectly on your bookshelf. Special Needs Coordinators file: Nichola Jones shows how to plan a whole school approach to including children with dyspraxia and developmental coordination disorder in this short and accessible guide. It offers those in managerial and supervisory roles within schools and special education support services clear guidance on successful models of provision that have worked successfully in schools and LEAs. By focusing on the key aspects of service delivery and drawing on well-known specialists within the field, the book includes sections on planning strategically for inclusive practice, assessment, handwriting, gross motor programmes, adapting the PE curriculum, supporting parents, working with other agencies, listening to the children involved. SENCOs, class teachers, LEA advisers and support agencies will find it an invaluable guide to successful inclusive practice.

Text Entry Systems covers different aspects of text entry systems and offers prospective researchers and developers global guidelines for conducting research on text entry in terms of design strategy, evaluation methodology and requirements, a discussion of the history and current state of the art of entry systems and specific guidelines for designing entry systems for a specific target depending on devices, modalities, language and different physical conditions of users. Text entry has never been so important as it is today. This is in large part due to the phenomenal, relatively recent success of mobile computing, text messaging on mobile phones and the proliferation of small devices like the Blackberry and Palm Pilot. Compared with the recent past when text entry was primarily through the standard qwerty keyboard, people today use a diverse array of devices with the number and variety of such devices ever increasing. The variety is not just in the devices but also in the technologies used; entry modalities have become more varied and include speech recognition and synthesis, handwriting recognition and even eye tracking using image processing on webcams. Statistical language modeling has advanced greatly in the past ten years and so therein is potential to facilitate and improve text entry increasingly the way people communicate. This book covers different aspects of text entry systems and offers prospective researchers and developers global guidelines for conducting research on text entry in terms of design strategy, evaluation
