The Empire of Effects Julie A. Turnock, 2022-06-14 2024 Finalist Marshall McLuhan Outstanding Book Award Media Ecology Association How one company created the dominant aesthetic of digital realism Just about every major film now comes to us with an assist from digital effects The results are obvious in superhero fantasies yet dramas like Roma also rely on computer generated imagery to enhance the verisimilitude of scenes But the realism of digital effects is not actually true to life It is a realism invented by Hollywood by one company specifically Industrial Light Magic The Empire of Effects shows how the effects company known for the puppets and space battles of the original Star Wars went on to develop the dominant aesthetic of digital realism Julie A Turnock finds that ILM borrowed its technique from the New Hollywood of the 1970s incorporating lens flares wobbly camerawork haphazard framing and other cinematography that called attention to the person behind the camera In the context of digital imagery however these aesthetic strategies had the opposite effect heightening the sense of realism by calling on tropes suggesting the authenticity to which viewers were accustomed ILM's style on display in the most successful films of the 1980s and beyond was so convincing that other studios were forced to follow suit and today ILM is a victim of its own success having fostered a cinematic monoculture in which it is but one player among many

Net Privacy Sacha Molitorisz, 2020-05-21 In our digital world, we are confused by privacy: what is public, what is private? We are also challenged by it: the conditions of privacy so uncertain, we become unsure about our rights to it. We may choose to share personal information, but often do so on the assumption that it won't be re-shared, sold, or passed on to other parties without our knowing. In the eighteenth century, philosopher Jeremy Bentham wrote about a new model for a prison called a Panopticon, where inmates surrounded the jailers, always under watch. Have we built ourselves a digital Panopticon? Are we the guards or the prisoners, captive or free? Can we be both? When Kim Kardashian makes the minutiae of her life available online, which is she? With great rigour, this important book draws on a Kantian philosophy of ethics and legal frameworks to examine where we are and to suggest steps, conceptual and practical, to ensure the future is not dystopian. Privacy is one of the defining issues of our time; this lively book explains why this is so and the ways in which we might protect it.

Laboratory Lifestyles Sandra Kaji-O'Grady, Chris L. Smith, Russell Hughes, 2019-02-05 A generously illustrated examination of the boom in luxurious resort-style scientific laboratories and how this affects scientists' work. The past decade has seen an extraordinary laboratory building boom. This new crop of laboratories features spectacular architecture and resort-like amenities. The buildings sprawl luxuriously on verdant campuses or sit sleekly in expensive urban neighborhoods. Designed to attract venture capital, generous philanthropy, and star scientists, these laboratories are meant to create the ideal conditions for scientific discovery. Yet there is little empirical evidence that shows if they do. Laboratory Lifestyles examines this new species of scientific laboratory from architectural, economic, social, and scientific perspectives. Generously illustrated with photographs of laboratories and scientists at work in them, the book investigates how lifestyle science affects actual science. Are scientists working when they stretch in a yoga class, play volleyball in the company tournament, chat in an on-site café, or show off their facilities to visiting pharmaceutical executives? The book describes, among other things, the role of beanbag chairs in the construction of science at Xerox PARC, the Southern California vibe of the RAND Corporation, Malibu General Atomic, La Jolla, and Hughes Research Laboratories, Malibu, and Biosphere 2's bionauts as both scientists and scientific subjects, and interstellar laboratories. Laboratory Lifestyles: the title is an allusion to Bruno Latour and Steve Woolgar's influential Laboratory Life, documents a shift in what constitutes scientific practice; these laboratories and their lifestyles are
