

ACTIVITY 2: CONSTRUCTING A DICHOTOMOUS KEY

Here are the rules that should guide you as you construct your branching tree diagram and dichotomous key:

1. Each feature (question) must divide a group into two smaller groups (the subdivisions need not be equal in size)
2. Each feature (question) must be unambiguous (specific); a critter must clearly fall into one category or the other
3. Terms used in the question must be clearly defined (If you use "wings," "legs," or "antennae" as distinguishing features, you must define what you mean by each)
 - You can use both the presence and absence of a feature as well as a characteristic of that feature.
Ex. Legs – No legs or 6 legs – 8 legs

For the branching tree diagram be sure to do the following:

- 1.) Start with the superset and list all the creatures in a box.
- 2.) Divide each box into two boxes
 - List the descriptive feature which divides the critters in each box
 - Ex. Legs – no legs
 - List the critters that belong to the feature in each box
 - Repeat until there is only one critter to a box
- 3.) Label each box accordingly using numbers and letters
 - Ex. 1a – 1b, 2a – 2b, and so on.

- ❖ Note: when dividing critters based on various characteristics, you are only concerned with finding difference among the critters from the previous box.

To make the key that corresponds to your tree diagram be sure to do the following:

- 1.) The key must include all of the critters
- 2.) Write the descriptive feature from box 1a of your tree onto the line 1a of your key.
- 3.) Continue copying the descriptive features from the tree boxes into your key.
- 4.) For the "Go To" column, list the number associated with next set of questions your reader should follow to identify their critter.
- 5.) When the critter has been identified, list the critter (as there is nowhere else for the reader to go)
