Octavio González Caballero grew up in Paraguay and is going to college in Chile. So how did he end up in Knoxville, Tennessee, putting shingles on the roof of a new home for a poor family? González Caballero is one of the international students who has traveled across the globe to join Habitat for Humanity, a nonprofit organization that brings people together to build homes for families in need.

The idea for Habitat for Humanity began when wealthy businessperson Millard Fuller and his wife, Linda, began looking for ways to help those who were less fortunate. The Fullers partnered with an organization in Georgia that provided homes for poor families. Habitat for Humanity was formed in 1976. Since then, Habitat for Humanity has constructed more than 500,000 houses around the world.

In between hammering, González Caballero takes a break and talks about why the program is so important to him. "I enjoy getting to share this experience with the family. I also wanted to see what Habitat is doing in the United States," he says. "Habitat gives people an opportunity, and families need an opportunity. It's a satisfactory feeling being a part of that."

When he finishes working in Knoxville, González Caballero will visit other U.S. cities to talk about the success of the program in other countries. He will share stories about the 400 homes that have been built back in his home country.

González Caballero wants to finish college, where he is studying to be an engineer. But he does not plan to abandon the Habitat for Humanity philosophy. Upon graduation, González Caballero hopes to work for a nonprofit organization and continue to make a better world for everyone.
