The Lobster Moth Caterpillar

The lobster moth caterpillar is an incredible creature! It has a vibrant orange and black striped body. It looks like a lobster or a shrimp. That's how it received its name. The caterpillar spends most of its time in the trees eating leaves and foliage.

The lobster moth caterpillar eats exclusively from leaves and foliage.

This caterpillar resembles the lobster. As it develops into an adult, it undergoes an incredible transformation. Its body is no longer plump and colorful. It will be slim and grayish brown. It will have a row of yellow spots along each side of its back.

This metamorphosis isn't the only thing that makes the lobster moth caterpillar unique. Another cool feature is that when threatened, it uses defense mechanisms. The caterpillar can protect itself from predators. When disturbed, it opens up its front legs to look like pincers and scare off any attackers. It also has two small horns on either side of its head. These resemble a foul odor when disturbed. This nasty smell helps ward off predators. They no longer want to prey on the caterpillar.

The lobster moth caterpillar also has some unusual behaviors during winter. Some of the most unusual behaviors are when they hibernate in large groups or trees. They join in communal activities. These could include molting. Climbing their favorite trees. These gatherings are quite remarkable. They can sometimes be seen in large groups. They are usually applied well on a tree!

At first, the adult lobster moth caterpillar may look like decaying leaves (black color).

Reading Comprehension Allan Wigfield, 2004-05-20 Concept Oriented Reading Instruction (CORI) is a unique classroom tested model of reading instruction that breaks new ground by explicitly showing how content knowledge, reading strategies and motivational support all merge in successful reading instruction. A theoretical perspective on engagement in reading frames the book and provides a backdrop for its linkage between hands-on science activities and reading comprehension. Currently funded by the Interagency Educational Research Initiative (IERI), this model has been extensively class tested and is receiving national attention that includes being featured on a PBS special on the teaching of reading. Key features of this outstanding new volume include: Theoretical Focus: CORI's teaching framework revolves around the engagement perspective of reading, how engaged reading develops and the classroom contexts and motivational supports that promote it. Content Area Focus: Although science is the content area around which CORI has been developed, its basic framework is applicable to other content areas. Focus on Strategy Instruction: CORI revolves around a specific set of reading strategies that the National Reading Panel 2000 found to be effective. In some current CORI classrooms, collaborating teachers implement all aspects of CORI and in other classrooms teachers implement just the strategy instruction component. Illustrative Vignettes and Cases: Throughout the book, vignettes and mini case studies convey a situated view of instructional practices for reading comprehension and engagement. A detailed case study of one teacher and of the reading progress of her students is featured in one chapter. This book is appropriate for graduate and advanced undergraduate students in education and psychology, for practicing teachers and for researchers in reading comprehension and motivation. **Comprehension Difficulties of**
