This volume will examine the responsibilities of expert witnesses and consultants and how they may utilize principles, theories, and methods from both sociology and psychology. It will show these disciplines together can improve the identification and apprehension of criminals as well as enhance the administration of justice by clarifying profiles of criminal behavior, particularly in cases of serial killers, death threat makers, stalkers, and kidnappers. The volume is quite comprehensive, covering a range of medical, school, environmental, and business settings. Throughout, it links basic ideas to real applications and their impact on the justice system.
