Planet Mentum Guide:

The Rough Guide to Surviving the End of the World Rough Guides, 2012-08-16 The Rough Guide to Surviving the End of the World is a light hearted yet well informed look at threats to the very existence of life on Earth how we might be able to deal with them and if things go truly horribly wrong how we might just be able to survive Written by scientist and sci fan Paul Parsons this gripping book examines scenarios ranging from megafloods to space radiation supervolcanoes to bioengineering and what you should do when the sh t hits the fan Along the way we meet some of the lesser trodden paths to oblivion including the possibility that the human race will be gripped by mass stupidity and the outrageous idea that life on Earth could all be one giant Matrix style computer simulation that its creators might one day decide to switch off All are placed under the scientific spotlight and presented with clarity and humor To survive Armageddon you need the best advice and information available which is here presented in ample detail and capturing every plausible catastrophic scenario Now available in ePub format

Fundamental Questions in Astrophysics: Guidelines for Future UV Observatories Ana I. Gómez de Castro, Willem Wamsteker, 2007-01-30 Modern astrophysics is a mature science that has evolved from its early phase of discovery and classification to a physics oriented discipline focused on finding answers to fundamental problems ranging from cosmology to the origin and diversity of life sustainable systems in the Universe For this very reason progress of modern astrophysics requires access to the electromagnetic spectrum in the broadest energy range The Ultraviolet is a fundamental energy domain since it is one of the most powerful tools to study plasmas at temperatures in the 3 000 300 000 K range as well as electronic transitions of the most abundant molecules in the Universe Moreover the UV radiation field is a powerful astrochemical and photoionizing agent This book describes the fundamental problems in modern astrophysics that cannot progress without easy and wide spread access to modern UV instrumentation

[Guidance and Control](#) Robert Roberson, 2012-12-02 Guidance and Control focuses on space guidance models and behavior control techniques needed in space missions Divided into eight parts with 30 chapters the book contains the literature of authors who have conducted extensive research on factors affecting space missions The concerns include ascent from Earth to an orbit requiring navigation as well as descent to Earth or the moon the system aspects of inertial navigation and developments in modern control theory and attitude control The text looks at experiments on the launch of space missions and the different mathematical techniques used to measure the movement of a variable mass vehicle The selection also notes the processes and techniques involved in keeping satellites in compatible orbits the influence of calculus of perturbations as applied to lunar mission analysis and tracking of space vehicles through satellites and radar The book also presents guidance systems for soft lunar landing and the longitudinal control of a lifting vehicle entering a planetary atmosphere Other concerns include the application of sideband folding techniques to navigation satellite system Damping an inertial navigation system and application of multiple inertial system in navigation The text ends by highlighting the use of gyroscopes in space navigation
