Stiefel, Jeremy C. Wells, 2014-09-02 Over the past twenty years there has been a fundamental shift in the institutional organization of historic preservation education Historic preservation is the most recent arrival in the collection of built environment disciplines and therefore lacks the pedagogical depth and breadth found in allied endeavors such as architecture and planning As the first degree programs in preservation only date to the 1970s and the first doctoral programs to the 1990s new faculty are confronted with pedagogical challenges that are unique to this relatively nascent field Based on a conference that included educators from around the world Barry L Stiefel and Jeremy C Wells now present a collection that seeks to address fundamental issues of preservation pedagogy outcome based education and assessment and global issues of authenticity and significance in historic preservation The editors argue that the subject of the analysis has shifted from What is the best way to fix a historic building to What are the best ways for teaching people how to preserve historic properties and why according to the various standards that have been established This important reconsideration of the state of the field in historic preservation education will appeal to a broad audience across numerous disciplines **The Planner's Use of Information** Hemalata C. last hundred years not because of traffic population growth or other practical hurdles but because of ill considered theories emerging from Modernism and reactions to it The errors of urban design over the last century are too great not to question The solutions being offered today sustainability walkability smart and green technologies hint at what has been lost and what may be regained but they remain piecemeal and superficial In *The Art of Classic Planning* architect and planner Nir Haim Buras documents and extends the time tested and holistic practices that held sway before the reign of Modernism With hundreds of full color illustrations and photographs that will captivate architects planners administrators and developers *The Art of Classic Planning* restores and revitalizes the foundations of urban planning Inspired by venerable cities like Kyoto Vienna and Venice and by the great successes of L'Enfant's Washington Haussmann's Paris and Burnham's Chicago Buras combines theory and a host of examples to arrive at clear guidelines for best practices in classic planning for today's world *The Art of Classic Planning* celebrates the enduring principles of urban design and invites us to return to building beautiful cities
