Electronics Buying Guide, 2008 **Laser TV** Fouad Sabry, 2022-02-21 What Is Laser TV? Laser color television or laser color video display utilizes two or more individually modulated optical laser rays of different colors to produce a combined spot that is scanned and projected across the image plane by a polygon mirror system or less effectively by optoelectronic means to produce a color television display. The systems work either by scanning the entire picture a dot at a time and modulating the laser directly at high frequency much like the electron beams in a cathode ray tube or by optically spreading and then modulating the laser and scanning a line at a time, the line itself being modulated in much the same way as with digital light processing (DLP).
