

**SCHOOL HEADS DEVELOPMENT PROGRAM
FOUNDATION COURSE
APPLICATION PROJECT
CONCEPT PAPER**

Welcome to the School Heads Development Program (SHDP) -Foundation Course! The SHDP is a systematic competency-based educational leadership and management development program that aims to enable school heads to lead and manage K-12 schools in the 21st century.

Participants of the Foundation Course are new school heads, school heads that need training to be promoted to principal, and other candidates who are being considered for the position who do not have prior experience as school head. It is a three-module course that covers the principal's role in delivering the curriculum and core programs, managing school processes, strategic human resource management and development, fiscal management, partnership, and leadership.

The requirements for a Certificate of Completion include complete attendance in the course and the implementation of an Application Project as proof of learning. The Project requires the participant to identify a specific area of school operations that require improvement and that will deliver the best impact on school measures in three (3) to six (6) months. In this project, the principal is expected to apply learned competencies in improving the school. The participant will be required to present significant milestones achieved at the end of each month.

An entry requirement to the Course is the submission of a duly accomplished Concept Note that identifies three (3) specific areas of school operations that need significant improvement in the school. The area for consideration include:

1. Curriculum, Core, and Support Programs
2. Instructional Leadership
3. School leadership: SBM, SIP, CI, Partnership
4. Strategic Human Resource Development
5. Fiscal Management

By the end of this three-module course, the participant will be asked to select one of these three areas as a project.

Please adhere to the word limit requirement.

Lean Development and Innovation Luciano Attolico, 2018-09-06 Using Toyota's principles for product and process development this book focuses the implementation of the Lean system during the past 10 years in dozens of corporations across various industries. The book highlights all steps on the journey from common trouble area to remarkable results. As it is written by a manager for other managers it contains real work discoveries and insights. The author provides case studies from many different fields of application. The reader gains insight on US and European companies that successfully streamlined their innovation and product development processes. These companies have overcome difficult periods and major challenges thanks to the ability to innovate with new Lean methodologies and above all a new workplace culture and mindset. The goal of this book is to help managers successfully apply Lean principles in the innovation and development area of their company while benefitting from the author's lessons learned during his many years of capitalized experience. This book provides a comprehensive framework that supports step by step the successful application of Lean principles in the innovation and development areas of the company. Readers learn how to drastically reduce the time required to develop products and discover and eliminate hidden costs and critical waste while increasing value for customers. *Federal Register*, 2001-08 Fish and Wildlife Implementation Plan, 2003 *Senior Design Projects in Mechanical Engineering* Yongsheng Ma, Yiming Rong, 2021-11-10 This book offers invaluable insights about the full spectrum of core design course contents systematically and in detail. This book is for instructors and students who are involved in teaching and learning of capstone senior design projects in mechanical engineering. It consists of 17 chapters over 300 illustrations with many real world student project examples. The main project processes are grouped into three phases i.e. project scoping and specification conceptual design and detail design and each has dedicated two chapters of process description and report content prescription respectively. The basic principles and engineering process flow are well applicable for professional development of mechanical design engineers. CAD CAM CAE technologies are commonly used within many project examples. Thematic chapters also cover student teamwork organization and evaluation project management design standards and regulations and rubrics of course activity grading. Key criteria of successful course accreditation and graduation attributes are discussed in details. In summary it is a handy textbook for the capstone design project course in mechanical engineering and an insightful teaching guidebook for engineering design instructors. **Successful Grant Writing, 4th Edition** Laura N.
