

**Chapter 68: Emergency and Disaster Nursing****Harding: Lewis's Medical-Surgical Nursing, 11th Edition**

MULTIPLE CHOICE

1. During the primary assessment of a victim of a motor vehicle collision, the nurse determines that the patient has an unobstructed airway. Which action should the nurse take **next**?
- Palpate extremities for bilateral pulses.
 - Observe the patient's respiratory effort.
 - Check the patient's level of consciousness.
 - Examine the patient for any external bleeding.

ANS: B

Even with a patent airway, patients can have other problems that compromise ventilation, so the next action is to assess the patient's breathing. The other actions are also part of the initial survey, but assessment of breathing should be done immediately after assessing for airway patency.

DIF: Cognitive Level: Apply (application)

TOP: Nursing Process: Assessment

MSC: NCLEX: Physiological Integrity

2. During the primary survey of a patient with severe leg trauma, the nurse observes that the patient's left pedal and posterior tibial pulses are absent, and the entire leg is swollen. Which action will the nurse take **next**?
- Send blood to the lab for a complete blood count.
 - Assess further for a cause of the decreased circulation.

Sample Lewis Medsurg Test Bank:

Lewis's Medical-Surgical Nursing 6th Australia and New Zealand Edition Diane Brown, Thomas Buckley, Robyn Aitken, Helen Edwards, 2023-11-28 Lewis's Medical Surgical Nursing has long been considered a comprehensive and reliable resource for nursing students preparing for their transition into clinical practice. This sixth edition has been fully updated to incorporate the latest research data, current clinical practice procedures and guidelines. The text addresses core skills and knowledge that students need to pass their exams and go on to provide expert clinical care. It prepares nurses to assess patients, understand underlying diseases and their signs and symptoms, and go on to plan and deliver care. The text encourages readers to develop their clinical reasoning and problem-solving skills in order to apply theory to their work. This edition has been produced by leading expert nursing academics and clinicians who bring a strengthened focus on inclusion and diversity. Provides a person-centred holistic approach to patient assessment and care. Complex concepts are illustrated with figures, tables, summaries and reflections of best practice. Case studies throughout based on real-life medical surgical scenarios help students to apply theory to real life. Clinical practice features offer practical guidance for students. Underpinned by the nursing process framework. Instructor resources on Evolve: Image collection, PowerPoint slides, Student and Instructor resources on Evolve, Answer guidelines for clinical reasoning questions in case studies, Student case studies, Fluids and electrolytes tutorial, eNursing Care Plans, Clinical Cases, Case Study Review questions and answers with answer rationale, Conceptual Care Map, Createo Refreshed and up-to-date evidence, statistics, standards and procedures. Updated chapters on the deteriorating patient and advanced life support to reflect recent international ILCOR and national ARC practice guidelines. New chapter on caring for individuals with intellectual disability and autism. Increased focus throughout on culturally safe care that aims to improve access to services and improved health outcomes for Māori, Aboriginal and Torres Strait Islander people. Focus on the impact of COVID-19. Enhanced content on gender equity, mental health, intellectual disability and autism, harm minimisation for people experiencing the effects of alcohol and other drugs, patient safety and nurses' wellbeing and safety at work. Updated Evolve resources for students and instructors. **Lewis's Medical-Surgical Nursing E-Book** Mariann M. Harding, Jeffrey Kwong, Dottie Roberts, Debra Hagler, Courtney Reinisch, 2019-09-07 Get a unique conceptual approach to nursing care in this rapidly changing healthcare environment. Lewis's Medical Surgical Nursing 11th Edition gives you a solid foundation in medical surgical nursing. This thoroughly revised text includes a more conversational writing style, an increased focus on nursing concepts and clinical trends, strong evidence-based content and an essential pathophysiology review. Content covers all aspects of nursing care including health promotion, acute intervention and ambulatory care. Helpful boxes and tables make it easy for you to find essential information and a building block approach makes even the most complex concepts simple to grasp. Key topics such as interprofessional care, delegation, safety and prioritization are integrated throughout. Additionally, extensive drug therapy information and diagnostic studies tables

Cumulated Index Medicus ,1994 *Commerce Business Daily* ,1999 Analysis of Hospital Costs Donald S. Shepard,Dominic Hodgkin,Yvonne E. Anthony,2000 A practical guide to the principles and methods of cost analysis as a managerial tool for improving the efficiency of hospitals Addressed to managers and administrators the manual aims to equip its readers with the knowledge and skills needed to calculate the costs of different activities or departments analyse their significance and use this information to manage resources wisely Throughout recommendations and advice are specific to the different purposes of cost analysis and the different types of decisions commonly facing managers The manual which is intended for use as a training tool was finalized following extensive field testing in workshops in Bangladesh Egypt and Zimbabwe Methods of cost finding and cost analysis are thoroughly explained and illustrated with practical examples and model step by step procedures for performing calculations Since hospital accounting systems in developing countries may have gaps or inaccuracies the manual gives particular attention to reliable methods for estimating costs when existing data are problematic The manual opens with an explanation of the many advantages of using cost finding and cost analysis as managerial tools These include the provision of data needed for informed decisions on operations and

infrastructure investment the planning of future budgets the establishment of charges for patient services and the development of mechanisms for ensuring that costs do not exceed available revenues and subsidies Against this background the core of the manual is presented in three chapters The first and most extensive chapter explains how to allocate costs to cost centres and how to compute unit costs Information and examples are presented according to seven steps Each is discussed in terms of the types of data needed how component cost items should be treated and how costs can be computed in particular situations or cases Practical examples are used to illustrate the types of questions addressed in cost analysis and the value of this information in guiding decisions Chapter two explains how cost data can be used to improve the management of an individual hospital Information is intended to guide decisions at both the cost centre or department level and the hospital level Managerial tasks covered include budgeting profitability efficiency improvements contracting outside services or producing in house and assessing fiscal solvency Chapter three considers the use of cost data in managing national and regional hospital systems Specific applications include improvements in the referral system the appropriate use of different providers of services and the comparison of similar hospitals to identify inefficiencies or sources of waste The manual concludes with a series of practical exercises followed by explanations of their answers
