**Perfect Pairs, K-2** Melissa Stewart, Nancy Chesley, 2023-10-10 Hands on lessons can be fun and compelling but when it comes to life science they aren't always possible practical effective or safe Children can't follow a lion as it stalks a gazelle visit the exotic kapok tree in a rain forest or swim alongside the underwater life in a pond But they can explore a whole world of animals plants and ecosystems through the pages of beautifully illustrated science themed picture books Perfect Pairs which marries fiction and nonfiction picture books focused on life science helps educators think about and teach life science in a whole new way Each of the twenty two lessons in this book is built around a pair of books that introduces a critical life science concept and guides students through an inquiry based investigative process to explore that idea from animal environment interactions to the role of structure in plant and animal survival from inheritance of traits to variation of species Each lesson starts with a Wonder Statement and comprises three stages Engaging Students features a hands on activity that captures student interest uncovers current thinking and generates vocabulary The heart of the investigative process Exploring with Students spotlights the paired books as the teacher reads aloud and helps students find and organize information into data tables Encouraging Students to Draw Conclusions shows students how to review and analyze the information they have collected Bringing high quality science themed picture books into the classroom engages a broad range of students addresses the Performance Expectations outlined in the Next Generation Science Standards and supports the goals of the Common Core State Standards for English Language Arts Even if you are science shy Perfect Pairs can help you become a more confident teacher whose classroom buzzes with curious students eager to explore their natural world

**Perspectives on Multigrade Teaching** Linley Cornish, Matshidiso Joyce Taole, 2021-10-25 This book contains the results of research projects carried out in relation to multigrade teaching in Australia and South Africa Research in multigrade contexts is not commonly reported and rarely in book form The research results have implications for multigrade teachers government education personnel and university teacher educators The book also contains chapters with practical advice for multigrade teachers including examples of

multigrade teaching used in an Australian seven grade class kindergarten to grade 6 Other chapters contain suggestions for practical strategies a multigrade teacher can use to reduce the workload involved in planning for multiple grades Very little is published in the area of multigrade teaching yet the number of multigrade schools worldwide is huge Developed countries still have a significant proportion of multigrade schools commonly one fifth to one third of all primary schools or classes Despite decades of centralisation of schools and expansion of transport networks the number of these schools remains high mostly in rural areas Developing countries established multigrade schools in rural areas in order to achieve the UN Millennium Development Goal of Universal Primary Education Yet specific training to teach a multigrade class remains virtually non existent in initial teacher education programs worldwide The value of this book is thus to report specific research carried out in multigrade contexts but also to provide practical help for multigrade teachers This help is needed as the teachers strive to achieve the UN Sustainable Development Goal of a quality education through helping their students develop the skills and behaviours required for 21st century learning

*What Teachers Want to Know About Teaching Climate Change* Bertha Vazquez,Kimi Waite,Lauren Madden,2025-02-17 Inspire the next generation to create a sustainable and hopeful future Climate change is one of the greatest threats humanity has ever faced The most recent 10 years have been the hottest on record and the results have been increasingly extreme storms flooding and fires around the world Understanding the causes of climate change and potential solutions is essential learning for students and is aligned with NGSS standards A recent report by the North American Association for Environmental Education Research indicates that 74 percent of U S teachers and 80 percent of administrators agree that climate change will have an overwhelming impact on students futures But according to the same survey of more than 1000 teachers only 42% say they even mention climate change in the classroom In an effort to support teachers Corwin conducted a market survey sent to more than 135 000 educators and school leaders in North America asking about their concerns regarding teaching climate change The top three issues reported were concern that the content was not related to their subject 65% a worry that children were too young or vulnerable for such an upsetting topic 20% and lack of confidence in their ability to understand and teach the science behind climate change 17% In response to these concerns authors Bertha Vazquez Kimi Waite and Lauren Madden wrote *What Teachers Want to Know About Teaching Climate Change* to provide research based and classroom tested guidance for K 12 educators to teach climate change accurately effectively and confidently The book gives busy teachers the tools they need to incorporate climate change education across disciplines and align the content with existing standards without adding a new topic for overworked teachers to tackle Offering a practical roadmap for teachers to integrate climate change lessons into their existing curriculum this book Includes crowd sourced tips for reducing our carbon footprint and inspiring success stories from teachers who have effectively taught climate change in their classrooms Focuses on overcoming additional obstacles to teaching climate change such as lack of data literacy and potential partisan pushback Debunks the 10 most

common misconceptions about climate change and encourages critical thinking skills to help students identify misinformation Fosters hope in students by acknowledging their personal agency and encouraging collective and meaningful action that builds community Provides bibliographies of free curriculum lessons and other content for teaching climate change across various age groups and disciplines This book is an essential resource for educators and leaders inside and outside of the science classroom who want to help their students build a better tomorrow *The School Garden Curriculum* Kaci Rae Christopher, 2019-04-23 Sow the seeds of science and wonder and inspire the next generation of Earth stewards The School Garden Curriculum offers a unique and comprehensive framework enabling students to grow their knowledge throughout the school year and build on it from kindergarten to eighth grade From seasonal garden activities to inquiry projects and science skill building children will develop organic gardening solutions a positive land ethic systems thinking and instincts for ecological stewardship The world needs young people to grow into strong scientifically literate environmental stewards Learning gardens are great places to build this knowledge yet until now there has been a lack of a multi grade curriculum for school wide teaching aimed at fostering a connection with the Earth The book offers A complete K 8 school wide framework Over 200 engaging weekly lesson plans ready to share Place based activities immersive learning and hands on activities Integration of science critical thinking permaculture and life skills Links to Next Generation Science Standards Further resources and information sources A model and guide for all educators The School Garden Curriculum is the complete package for any school wishing to use ecosystem perspectives science and permaculture to connect children to positive land ethics personal responsibility and wonder while building vital lifelong skills AWARDS FINALIST 2019 Foreword INDIES Education [The Ohio Teacher](#), 1921 [The Learning Cycle and Elementary School Science Teaching](#) John Wilson Renner, 1988 [Title List of Documents Made Publicly Available](#) U.S. Nuclear Regulatory Commission, 1989 [A Manual Containing the Graded Course of Study for the Elementary Schools Including Grades 1-6 and for the Junior High Schools Including 7th, 8th and 9th Grades, State of West Virginia.
