The Power of Love and Democracy in the Philosophies of Martin Luther

King, Jr. and Cornel West Timothy L. Lake, 2025-09-18 This book locates an ethic of love as central to the democratic philosophies of Martin Luther King Jr and Cornel West While much has been written about King's moral vision social activism and theology there has been no book length treatment of the implications of his thinking to democratic theory Additionally Cornel West is the leading African American public intellectual of our time but the range of his cultural criticism and academic scholarship obscures his intellectual and social projects This project synthesizes West's vast corpus and places him within the modern African American intellectual tradition he shares with Du Bois King Maulana Karenga the creator of Kwanza and others Deeply grounded in the African American intellectual and philosophical traditions in which King and West are rooted as well as the Western mainstream political philosophical traditions in which they were educated this book offers a penetrating interpretation and comparative analysis of their thought on the ideals of democracy and of their critiques of American democracy It also reflects on the nature and values of democracy exploring how love is inseparable from justice in a democratic society

Philosophy of African American Studies Stephen Ferguson, 2015-09-16 In this ground breaking book Stephen C Ferguson addresses a seminal question that is too often ignored What should be the philosophical basis for African American studies The volume explores philosophical issues and problems in their relationship to Black studies Ferguson shows that philosophy is not a sterile intellectual pursuit but a critical tool to gathering knowledge about the Black experience Cultural idealism in various forms has become enormously influential as a framework for Black studies Ferguson takes on the task of demonstrating how a Marxist philosophical perspective offers a productive and fruitful way of overcoming the limitations of idealism Focusing on the hugely popular Afrocentric school of thought this book's engaging discussion shows that the foundational arguments of cultural idealism are based on a series of analytical and historical misapprehensions In turn Ferguson argues for the centrality of the Black working class both men and women to Black Studies

African Americans and the Classics Margaret Malamud, 2019-01-24 A new wave of research in black classicism has emerged in the 21st century that explores the role played by the classics in the larger cultural traditions of black America Africa and the Caribbean Addressing a gap in this scholarship Margaret Malamud investigates why and how advocates for abolition and black civil rights both black and white deployed their knowledge of classical literature and history in their struggle for black liberty and equality in the United States African Americans boldly staked their own claims to the classical

world they deployed texts ideas and images of ancient Greece Rome and Egypt in order to establish their authority in debates about slavery race politics and education A central argument of this book is that knowledge and deployment of Classics was a powerful weapon and tool for resistance as improbable as that might seem now when wielded by black and white activists committed to the abolition of slavery and the end of the social and economic oppression of free blacks The book significantly expands our understanding of both black history and classical reception in the United States History in Black Yaacov Shavit,2013-11-12 The development of Afrocentric historical writing is explored in this study which traces this recording of history from the Hellenistic Roman period to the 19th century Afrocentric writers are depicted as searching for the unique primary source of culture from one period to the next Such passing on of cultural traits from the ancient model from the classical period to the origin of culture in Egypt and Africa is shown as being a product purely of creative history **African American Political Thought** Melvin L. Philosophy of Religion and the African American Experience John H. McClendon III, 2017-07-03 Most white philosophers of religion generally presume that philosophy of religion is based on what is a false universality whereby the white Western experience is paradigmatic of humanity at large The fact remains that Howard Thurman James H Cone and William R Jones among others have produced a substantial amount of theological work quite worthy of consideration by philosophers of religion Yet this corpus of thought is not reflected in the scholarly literature that constitutes the main body of philosophy of religion

Neglect and ignorance of African American Studies is widespread in the academy By including chapters on Thurman Cone and Jones the present book functions as a corrective to this scholarly lacuna **African American Review** ,1996
