Students' personal development is an essential part of today's academic process. They must therefore be able to organize their ideas and critically evaluate particular experiences. Reflective writing is used in different ways in different health professions, but in all of them it is required to think carefully and critically about an experience or a book. The underlying theme of reflective writing is the 'self', which involves a thorough examination of one's relationship to the subject. The process of reflective writing involves remembering and thinking about an experience or event and then writing about it.
