This book deals with the last stage of this fascinating journey: the exploration of cyberspace and cybertime. Through the rapid global implementation of information and communication technologies, a new realm for human experience and imagination has been disclosed. Reversely, these postgeographical and posthistorical technologies have started to colonize our bodies and minds. Taking Homer's *Odyssey* and Kubrick's 2001 *A Space Odyssey* as his starting point, the author investigates the informatization of the worldview, focusing on its implications for our culture, arts, religion, and science, and ultimately our form of life. Moving across a wide range of disciplines, varying from philosophical anthropology and palaeontology to information theory and from astrophysics to literary film and new media studies, the author discusses our cyberspace odyssey from a reflective position beyond euphoria and nostalgia. His analysis is as profound as nuanced and deals with issues that will be high on the agenda for many decades to come. In 2003, a Dutch Edition of *Cyberspace Odyssey* received the Socrates Prize for the best philosophy book published in Dutch. **The Social Media Debate** Devan Rosen, 2022-02-17 This accessible student-friendly book provides a concise overview of the primary debates surrounding the impact and effects of social media. Individual Retweeting Behavior on Social Networking Sites Juan Shi, Kin Keung Lai, Gang Chen, 2020-09-19 This book explores and analyzes influential predictors and the underlying mechanisms of individual content sharing retweeting behavior on social networking sites SNS from an empirical perspective Since Individual content sharing retweeting behavior expedites information dissemination it is a critical mechanism of information diffusion on Twitter Individual sharing retweeting behavior does not appear to happen randomly So what factors lead to individual information dissemination behavior What are the dominating predictors How does the recipient make retweeting decisions How do these influential predictors combine and by what mechanism do they influence an individual s retweeting decisions Furthermore are there any differences in the process of individual retweeting decisions If so what causes such differences In order to answer these previously unexplored questions and gain a holistic view of individual retweeting behavior the authors examined people s retweeting history on Twitter and obtained a real

dataset containing more than 60 million Twitter posts They then employed text mining and natural language processing techniques to extract useful information from social media content and used various feature selection methods to identify a subset of salient features that have substantial effects on individual retweeting behavior Lastly they applied the Elaboration Likelihood Model to build an overarching theoretical framework to reveal the underlying mechanisms of individual retweeting behavior Given its scope this book will appeal to researchers interested in investigating information dissemination on social media as well as to marketers and administrators who plan to use social networking sites as an important avenue for information dissemination     The Backchannel Atkinson,2009     Watch the Company You Tweet Joy Cook,2015-01-13

Wagner,2013-11-29 Using theory and data Gainous and Wagner illustrate how online social media is bypassing traditional media and creating new forums for the exchange of political information and campaigning The authors illustrate how political actors utilized these networks to control the flow of information and garner votes in the 2010 congressional elections     **Breaking the Social Media Prism** Chris Bail,2021-04-06 A revealing look at how user behavior

is powering deep social divisions online and how we might yet defeat political tribalism on social media In an era of increasing social isolation platforms like Facebook and Twitter are among the most important tools we have to understand each other We use social media as a mirror to decipher our place in society but as Chris Bail explains it functions more like a prism that distorts our identities empowers status seeking extremists and renders moderates all but invisible Breaking the Social Media Prism challenges common myths about echo chambers foreign misinformation campaigns and radicalizing algorithms revealing that the solution to political tribalism lies deep inside ourselves Drawing on innovative online experiments and in depth interviews with social media users from across the political spectrum this book explains why stepping outside of our echo chambers can make us more polarized not less Bail takes you inside the minds of online extremists through vivid narratives that trace their lives on the platforms and off detailing how they dominate public discourse at the expense of the moderate majority Wherever you stand on the spectrum of user behavior and political opinion he offers fresh solutions to counter political tribalism from the bottom up and the top down He introduces new apps and bots to help readers avoid misperceptions and engage in better conversations with the other side Finally he explores what the virtual public square might look like if we could hit reset and redesign social media from scratch through a first of its kind experiment on a new social media platform built for scientific research Providing data driven recommendations for strengthening our social media connections Breaking the Social Media Prism shows how to combat online polarization without deleting our accounts

**Does Mere Connection Lead to Social Interaction in Online Social Networks? An Empirical Investigation on Flickr.Com** Xinlei Chen,Xiaohua Zeng,Yuxin Chen,2014 Online social networks such as Twitter and Facebook have become increasingly popular An interesting question is whether once people become friends in these online social networks they really influence each other Although a stream of research has studied the social interaction effect many of these studies employ a between subjects design which complicates the identification of the effect We address the question using a within subjects design and a unique data set from Flickr com thereby reducing the identification challenge Specifically we examine whether people s photo marking decisions are influenced by their friends Our findings reveal that friends do influence one another though the influence is asymmetric while an individual is more likely to mark a photo if her friends do so she is much less affected if her friends take no action We rule out one alternative explanation that this effect is driven by the influence of common friends We show that the social interaction is enhanced by users offline closeness measured by whether they live in the same country but not affected by their characteristics in the social network We also demonstrate the robustness of our findings against several assumptions made in the paper

Living in the Digital Age Pawel Bilinski,2019 This study examines the usefulness of Twitter YouTube and Instagram in corporate communication We document that Twitter communication helps investors interpret earnings news and associates with stronger price reactions to earnings announcements YouTube videos and Instagram pictures have either negative or no effect on investors ability to

understand earnings information Further firms that post on the three social platforms experience positive price reactions to earnings announcements regardless of the news content which suggests that investors perceive social media communication to signal higher disclosure effort The effects we document dominate in stocks with high retail ownership and are robust to endogeneity bias Our results suggest not all social media platforms help investors interpret earnings news though social media communication plays an important signalling role
