Roger Kerry, Barbara Cagnie, 2025-11-03 Musculoskeletal neck and head pain is one of the highest health burdens faced globally. Management of people with this pain is complex, multi-factorial and challenging. Scientific evidence continues to grow in this area but can often be confusing or contradictory. This multi-contributed compendium is a much-needed resource for all healthcare professionals, researchers and educators treating neck and head dysfunction. Taking a holistic and patient-centred approach, this vital interdisciplinary book discusses the background of these dysfunctions and reviews specific conditions of the neck and head. It also includes evidence-based clinical assessment and management, clinical reasoning and is supplemented with patient stories and supporting resources. **Bridge Evaluation, Repair and Rehabilitation** A.S.

Nowak, 2012-12-06 Evaluation, repair and rehabilitation of bridges are increasingly important topics in the effort to deal with the deteriorating infrastructure. For example, in the United States, about 40 percent of the nation's 570,000 bridges are classified according to the Federal Highway Administration's FHWA criteria as deficient and in need of rehabilitation and replacement. In other countries, the situation is similar. FHWA estimates the cost of a bridge replacement and rehabilitation program at 50 billion dollars. The major factors that have contributed to the present situation are the age, inadequate maintenance, increasing load spectra and environmental contamination. The deficient bridges are posted, repaired or replaced. The disposition of bridges involves clear economical and safety implications. To avoid high costs of replacement or repair, the evaluation must accurately reveal the present load-carrying capacity of the structure and predict loads and any further changes in the capacity deterioration in the applicable time span. Accuracy of bridge evaluation can be improved by using the recent developments in bridge diagnostics: structural tests, material tests, structural analysis and probabilistic methods. There is a need for an international exchange of advanced experience to increase the research efficiency. The Workshop is organized on the premise that the exchange of existing American and European experience in the area of bridge evaluation, repair and rehabilitation is beneficial for both parties involved. **Journal of Rehabilitation Research and Development**, 1996-02 **Government Reports Announcements & Index**, 1994 **Textbook of Remedial Massage** Sandra Grace, Jane Graves, 2019-09-30 Textbook of Remedial Massage 2e is a comprehensive and practical book for students and
