Evaluation of projects related to the Voluntary Guidelines on the Responsible Governance of Tenure of Land, Fisheries and Forests in the Context of National Food Security funded by Germany Food and Agriculture Organization of the United Nations,2021-06-04 FAO has been promoting the

Voluntary Guidelines on the Responsible Governance of Tenure of Land Fisheries and Forests VGGT in several countries and the Federal Republic of Germany had significantly contributed by financially supporting FAO's activities. The programme contributed through multi stakeholder platforms to an inclusive dialogue which led in most countries to the emergence of a common vision on land governance and positively influenced the land reform processes. It also triggered changes in mind set which are needed for long term improvements at country level. Results have shown that the VGGT while being international principles of land policy can be translated into concrete actions at the local level. The evaluation stressed the need for greater attention on developing activities to be carried out in local communities which result in defined precise and achievable gains on governance of tenure and to continue working on women and youth land access issues.

Improving ways to record tenure rights Food and Agriculture Organization of the United Nations, 2018-10-05 This guide is about making the recording or registration of tenure rights more relevant to people who hold those tenure rights and particularly to people who are currently poorly served by systems to record or register tenure rights. have returned to sculpture to answer questions about Roman art society and history. Indeed, the field of Roman sculptural studies encompasses not only the full chronological range of the Roman world but also its expansive geography and a variety of artistic media, formats, sizes, and functions. Exciting new theories, methods, and approaches have transformed the specialized literature on the subject in recent decades. Rather than creating another chronological catalogue of representative examples from various periods, genres, and settings, *The Oxford Handbook of Roman Sculpture* synthesizes current best practices for studying this central medium of Roman art, situating it within the larger fields of Art History, Classical Archaeology, and Roman Studies. This comprehensive volume fills the gap between introductory textbooks and highly focused professional literature. *The Oxford Handbook of Roman Sculpture* conveniently presents new technical, scientific, literary, and theoretical approaches to the study of Roman sculpture in one reference volume, while simultaneously complementing textbooks and other publications that present well-known works in the corpus. The contributors to this volume address metropolitan and provincial material from the early republican period through late antiquity in an engaging and fresh style. Authoritative, innovative, and up to date, *The Oxford Handbook of Roman Sculpture* will remain an invaluable resource for years to come.
