Portrait Of Lapworth:

Portrait of Lapworth Joy Woodall, Dorothy Dagger, 1986 **Proceedings of the Royal Society of London** Royal Society (Great Britain), 1920 *The Highlands Controversy* David R. Oldroyd, 1990-08-08 The Highlands Controversy is a rich and perceptive account of the third and last major dispute in nineteenth century geology stemming from the work of Sir Roderick Murchison. The earlier Devonian and Cambrian Silurian controversies centered on whether the strata of Devon and Wales should be classified by lithological or paleontological criteria but the Highlands dispute arose from the difficulties the Scottish Highlands presented to geologists who were just learning to decipher the very complex processes of mountain building and metamorphism. David Oldroyd follows this controversy into the last years of the nineteenth century as geology was transformed by increasing professionalization and by the development of new field and laboratory techniques. In telling this story Oldroyd's aim is to analyze how scientific knowledge is constructed within a competitive scientific community how theory, empirical findings and social factors interact in the formation of knowledge. Oldroyd uses archival material and his own extensive reconstruction of the nineteenth century fieldwork in a case study showing how detailed maps and sections made it possible to understand the exceptionally complex geological structure of the Highlands. An invaluable addition to the history of geology. *The Highlands Controversy* also makes important contributions to our understanding of the social and conceptual processes of scientific work especially in times of heated dispute.

Novel Science Adelene Buckland, 2022-12-22 *Novel Science* is the first in depth study of the shocking groundbreaking and sometimes beautiful writings of the gentlemen of the heroic age of geology and of the contribution these men made to the literary culture of their day. For these men literature was an essential part of the practice of science itself as important to their efforts as mapmaking, fieldwork and observation. The reading and writing of imaginative literatures helped them to discover, imagine, debate and give shape and meaning to millions of years of previously undiscovered earth history. Borrowing from the historical fictions of Walter Scott and the poetry of Lord Byron they invented geology as a science, discovered many of the creatures we now call the dinosaurs and were the first to unravel and map the sequence and structure of stratified rock. As Adelene Buckland shows they did this by rejecting the grand narratives of older theories of the earth or of biblical cosmogony; theirs would be a humble science faithfully recording minute details and leaving the big picture for future generations to paint. Buckland also reveals how these scientists just as they had drawn inspiration from their literary predecessors gave Victorian realist novelists such as George Eliot, Charles Kingsley and Charles Dickens a powerful language with which to create dark and disturbing ruptures in the too seductive sweep of story.

"A" Catalogue of Engraved National Portraits in the National Art Library, 1895 *A Catalogue of Engraved Portraits of Nobility, Gentry, Clergymen and Others, Born, Resident In, Or Connected with the County of Warwick* John Merridew, 1848 **Children's Fiction 1900-1950** John Cooper, 2019-07-23 First published in 1998 this volume explores how the genre of school stories had become firmly

established by the turn of the twentieth century having been built on the foundations laid by writers such as Thomas Hughes and F W Farrar Stories for girls were also taking on a more exciting complexion inspired by the Katy books of Susan Coolidge The first five decades of the twentieth century saw further developments in children s fiction In this comprehensive volume John and Jonathan Cooper examine each decade in turn with alphabetically arranged entries on popular children s writers that published works in English during that period 206 different authors are covered many from the United States and Canada Each entry provides information on the author s pseudonyms date of birth nationality titles of works place and date of publication and the publisher s name The artist responsible for a book s illustrations is also identified where possible With over 200 illustrations of cover designs and dustwrappers many of which are now rare and have never before been published this book will delight collectors dealers scholars librarians parents and all those who simply enjoy reading children s fiction
