explores key questions which have been considered by economists since the classical political economists. These include what degree of priority ought to be granted to property rights among all individual liberties, whether uncertainties in economic life justify investing political authorities with the power to stabilize business cycles, whether it is better to trust entrepreneurial initiatives to resolve societal dilemmas or to centralize policy making in the hands of a benevolent government. The chapters argue that economic thought has evolved from an emphasis on sympathy as defined by Adam Smith and that there has more recently been a rediscovery of the significance of sympathy reinvented as fair reciprocity in the wake of the emergence of behavioural economics and its connection to evolutionary psychology. This key book is of great interest to readers in the history of ideas, political and moral philosophy and political economy. [Handbook of Insurance](#) Georges Dionne, 2013-12-02.
