Drayton, 2024-10-03 Postmodern theatre is dead A new theatre is rising one that combines the well worn postmodern aesthetics of irony detachment and deconstruction with a paradoxical interest in authenticity engagement and reconstruction Whilst recent scholarship has treated these evolving interests as unrelated shifts in performance aesthetics this volume proposes a new understanding that these are part of a wider emerging cultural paradigm metamodernism *Metamodernism in Contemporary British Theatre* is the first book to focus on metamodernism and performance offering a pioneering framework by which to identify and understand metamodern theatre By drawing critical links between the works of performance theorists such as Anne Bogart and Andy Lavender and the metamodern as defined by Timotheus Vermeulen and Robin van den Akker this book makes a clear vital and urgent case for the use of the term metamodernism within mainstream theatre scholarship Focussing on small scale theatre companies across the UK including Poltergeist YESYESNONO Middle Child and The Gramophones many of whom have not been documented in academia before this book also provides a unique analysis of the theatre made by British millennials a generation who have been distinctly affected by specific structures of contemporary precarity coinciding with this wider cultural shift Through this *Metamodernism in Contemporary British Theatre* makes a crucial contribution towards understanding emergent developments in post millennial theatre practice across Britain and beyond Banking on Equality Supriti Bezbaruah, 2015-03-24 It may well be surprising to say that the world should look to India as a model of gender equality India's banking sector proves the exception with

several women reaching the highest positions in India's top banks including the country's largest bank. Based on interviews and surveys of bank employees in India's National Capital Region, this book looks at what lies behind the media rhetoric and provides a systematic analysis of patterns of and responses to gender inequality in the banking sector in India. The book uncovers how gender discrimination still persists in the banking sector albeit in covert forms. Through a comparison of nationalized Indian private and foreign banks, the book demonstrates how the impact of laws, local cultural norms, and gendered workplace practices are mediated through different organizational forms in these different types of banks to create varied experiences of gender inequality. The book is one of the first books to provide a thorough in-depth analysis of women's employment in the Indian banking sector, currently an under-researched area. [The Anxious Triumph](#) Donald

Sassoon, 2019-06-27. A magnum opus, an accessible and genuinely global history. This is a book for today and tomorrow. Financial Times. Capitalist enterprise has existed in some form since ancient times, but the globalization and dominance of capitalism as a system began in the 1860s when, in different forms and supported by different political forces, states all over the world developed their modern political frameworks: the unifications of Italy and Germany, the establishment of a republic in France, the elimination of slavery in the American south, the Meiji Restoration in Japan, the emancipation of the serfs in Tsarist Russia. This book magnificently explores how, after the upheavals of industrialisation, a truly global capitalism followed. For the first time in the history of humanity, there was a social system able to provide a high level of consumption for the majority of those who lived within its bounds. Today, capitalism dominates the world. With wide-ranging scholarship, Donald Sassoon analyses the impact of capitalism on the histories of many different states and how it creates winners and losers by constantly innovating. This chronic instability, he writes, is the foundation of its advance, not a fault in the system or an incidental by-product. And it is this instability, this constant churn, which produces the anxious triumph of his title. To control or alleviate such anxieties, it was necessary to create a national community, if necessary with colonial adventures, to develop a welfare state to intervene in the market economy and to protect it from foreign competition. Capitalists needed a state to discipline them, to nurture them, and to sacrifice a few to save the rest, a state overseeing the war of all against all. Vigorous, argumentative, surprising, and constantly stimulating, *The Anxious Triumph* gives a fresh perspective on all these questions and on its era. It is a masterpiece by one of Britain's most engaging and wide-ranging historians. **Atlas of Knowledge**

Katy Borner, 2015-03-20. The power of mapping: principles for visualizing knowledge, illustrated by many stunning large-scale, full-color maps. Maps of physical spaces locate us in the world and help us navigate unfamiliar routes. Maps of topical spaces help us visualize the extent and structure of our collective knowledge; they reveal bursts of activity, pathways of ideas, and borders that beg to be crossed. This book, from the author of *Atlas of Science*, describes the power of topical maps, providing readers with principles for visualizing knowledge and offering, as examples, forty large-scale and more than 100 small-scale, full-color maps. Today, data literacy is becoming as important as language literacy. Well-designed visualizations can rescue us

from a sea of data helping us to make sense of information connect ideas and make better decisions in real time In Atlas of Knowledge leading visualization expert Katy Brner makes the case for a systems science approach to science and technology studies and explains different types and levels of analysis Drawing on fifteen years of teaching and tool development she introduces a theoretical framework meant to guide readers through user and task analysis data preparation analysis and visualization visualization deployment and the interpretation of science maps To exemplify the framework the Atlas features striking and enlightening new maps from the popular Places Spaces Mapping Science exhibit that range from Key Events in the Development of the Video Tape Recorder to Mobile Landscapes Location Data from Cell Phones for Urban Analysis to Literary Empires Mapping Temporal and Spatial Settings of Victorian Poetry to Seeing Standards A Visualization of the Metadata Universe She also discusses the possible effect of science maps on the practice of science

Food and Cooking Skills Education Anita Tull, 2018-01-29 Food and Cooking Skills Education FCSE is a complex mix of policy and practicality educational theory and pedagogy classroom and government policy This book shows how FCSE has been at the centre of a tussle between education and policy for decades It reviews how FCSE has grappled with various significant issues of concern that threaten to marginalise it and pose problems for educational practicalities as expectations are increased but resources are squeezed It assesses the debate about the significance and importance of acquiring practical food and cooking skills in a society where the purchase of ready made food has become commonplace and public knowledge of where our food comes from is noticeably lacking This has contributed to the escalating incidence of diet related diseases and the attendant cost to society and threatened environmental sustainability In turn governments have reacted by proposals to make practical cooking skills a statutory National Curriculum subject as part of the armoury for tackling such costs Based on detailed research conducted across England and Wales as well as comparisons with thirty five other countries or states the author makes recommendations for policy to manage this challenge facing contemporary society

Doing Theology in the Age of Trump Dr. Jeffrey W. Robbins, Clayton Crockett, 2018-11-08 This book is a work of theological resistance It is not so much about the presidency of Donald Trump as it is about what his popularity and rise to power reveal about the state of Christianity and the moral character of the evangelical Right in the United States today More specifically it is about the threat of white Christian nationalism which is the particular form that the nationalist populist movement of Trumpism has adopted for itself The contributors are all fellows from the Westar Institute s academic seminar on God and the Human Future and include many of the leading figures in theology and Continental philosophy of religion This volume provides a form of theopolitical resistance based on intersectionality The authors recognize how the various forms of oppression interrelate to contribute to a vast dynamic and seeming impenetrable network of systemic injustice and marginalization These essays demonstrate that politics need not be played as a zero sum game with a winner take all mentality and that a critical theology is as urgently needed and as relevant now as ever

The Paralysis of Analysis in African American Studies

Stephen Ferguson II, 2023-09-21 Stephen C Ferguson II provides a philosophical examination of Black popular culture for the first time. From extensive discussion of the philosophy and political economy of Hip Hop music through to a developed exploration of the influence of the postmodernism/poststructuralist ideology on African American studies, he argues how postmodernism ideology plays a seminal role in justifying the relationship between corporate capitalism and Black popular culture. Chapters cover topics such as cultural populism, capitalism and Black liberation, the philosophy of Hip Hop music and Harold Cruse's influence on the cultural turn in African American studies. Ferguson combines case studies of past and contemporary Black cultural and intellectual productions with a Marxist ideological critique to provide a cutting-edge reflection on the economic structure in which Black popular culture emerged. He highlights the contradictions that are central to the juxtaposition of Black cultural artists as political participants in socioeconomic struggle and the political participants who perform the rigorous task of social criticism. Adopting capitalism as an explanatory framework, Ferguson investigates the relationship between postmodernism as social theory, current manifestations of Black popular culture, and the theoretical work of Black thinkers and scholars to demonstrate how African American studies have been shaped.

Feminist Futures Kum-Kum Bhavnani, John Foran, Priya A. Kurian, Debashish Munshi, 2016-10-15 Straddling disciplines and continents, *Feminist Futures* interweaves scholarship and social activism to explore the evolving position of women in the South. Working at the intersection of cultural studies, critical development studies, and feminist theory, the book's contributors articulate a radical and innovative framework for understanding the linkages between women, culture, and development, applying it to issues ranging from sexuality and the gendered body to the environment, technology, and the cultural politics of representation. This revised and updated edition brings together leading academics as well as a new generation of activists and scholars to provide a fresh perspective on the ways in which women in the South are transforming our understanding of development.

Russian Modernization Markku Kivinen, Brendan G. Humphreys, 2020-11-29 Building on an original interpretation of social theory and an interdisciplinary approach, this book creates a new paradigm in the Russian studies. Taking a fresh view of Russia's multiple experiences of modernization, it seeks to explain the Putin era in a completely new way. This book explores the paradoxical and contradictory aspects of Russia, analyzing the energy-dependent economy and hybrid political regime, but also religion, welfare, and culture, and their often complex interrelations. Written by a community of both Western and Russian scholars, this book reaffirms the value of social science when confronting a society that has undergone enormous and costly systematic changes. The Russian elites see modernization narrowly as economic and technological competitiveness. The contributors to this volume see contemporary Russia facing a series of antinomies, which are macro-level dilemmas that cannot be abolished either by philosophical mediation or by immediate political decisions. As such, they are the tension fields that constitute choices for various competing agencies. This book will be of interest to scholars and students of Russian studies, transition studies, sociology, social policy, political science, energy policy, cultural

studies and stratification studies Professionals involved in energy ecology and security policy will also find this publication a rich source
