Advances in poultry genetics and genomics Professor Sammy Aggrey, Prof. Huaijun Zhou, Dr Michèle Tixier-Boichard, Prof. Douglas D. Rhoads, 2020-07-21 Particular focus on improving functional traits needed for more resilient poultry breeds Comprehensive coverage of key advances in genomic selection and their practical application in breeding improved breeds of layers and broilers Looks forward to emerging trends such as the use of epigenetics and genome editing

Avian Immunology Bernd Kaspers, Karel A. Schat, 2011-04-28 The science underpinning avian immunology is crucial to understanding basic immunological principles and the exceptional features of the avian immune system as different strategies birds have adopted can provide important evolutionary insights This book provides the most complete picture of the avian immune system so far The world wide importance of poultry protein for the human diet the threat of an avian influenza pandemic and heavy reliance on vaccination to protect commercial flocks world wide demonstrates the need to review the important practical lessons in disease control presented here With contributions from 33 of the foremost international experts in the field this book provides the most up to date and comprehensive review of avian immunology of the field so far Contains a detailed description of the avian innate immune system reviewing constitutive barriers chemical and cellular responses it includes a comprehensive review of avian Toll like receptors Contains a wide ranging review of the Ecoimmunology of free living avian species assessing the importance of this subject for studying population dynamics and reviewing the methods and resources available for carrying out such research Animal Agriculture Fuller W. Bazer, G. Cliff Lamb, Guoyao Wu, 2019-10-25 Animal Agriculture Sustainability Challenges and Innovations discusses the land based production of high quality protein by livestock and poultry and how it plays an important role in improving human nutrition growth and health With exponential growth of the global population and marked rises in meat consumption per capita demands for animal source protein are expected to increase 72% between 2013 and 2050 This raises concerns about the sustainability and environmental impacts of animal agriculture An attractive solution to meeting increasing needs for animal products and mitigating undesirable effects of agricultural practices is to enhance the efficiency of animal growth reproduction and lactation Currently there is no resource that offers specific knowledge of both animal science and technology including biotechnology for the sustainability of animal agriculture for the expanding global demand of food in the

face of diminishing resources This book fills that gap giving readers all the necessary information on important issues facing modern animal agriculture namely its sustainability challenges and innovative solutions Integrates new knowledge in animal breeding biotechnology nutrition reproduction and management Addresses the urgent issue of sustainability in modern animal agriculture Provides practical solutions on how to solve the current and future problems that face animal agriculture worldwide

Sustainable Poultry Production in Europe Emily Burton, Joanne Gatcliffe, Helen Masey O'Neill, Dawn Scholey, 2016-04-27 Examining sustainable poultry production systems across Europe this book contains a selected cross section of papers from the 2014 UK Poultry Science Symposium It reviews essential topics such as resources and supply chains the global poultry market risk management zoonoses and green issues Providing a compilation of the most current research in the poultry science and production industry this book is an important resource for both researchers and professionals

How to Survive a Pandemic Michael Greger, M.D., FACLM, 2020-05-26 A vital timely text on the viruses that cause pandemics and how to face them by the New York Times bestselling author of How Not to Die From tuberculosis to bird flu and HIV to coronavirus these infectious diseases share a common origin story human interaction with animals Otherwise known as zoonotic diseases for their passage from animals to humans these pathogens both pre existing ones and those newly identified emerge and re emerge throughout history sparking epidemics and pandemics that have resulted in millions of deaths around the world How did these diseases come about And what if anything can we do to stop them and their fatal march into our countries our homes and our bodies In How to Survive a Pandemic Dr Michael Greger physician and internationally recognized expert on public health issues delves into the origins of some of the deadliest pathogens the world has ever seen Tracing their evolution from the past until today Dr Greger spotlights emerging flu and coronaviruses as he examines where these pathogens originated as well as the underlying conditions and significant human role that have exacerbated their lethal influence to large and even global levels As the world grapples with the devastating impact of the novel coronavirus 2019 Dr Greger reveals not only what we can do to protect ourselves and our loved ones during a pandemic but also what human society must rectify to reduce the likelihood of even worse catastrophes in the future

Genetics and the Behavior of Domestic Animals William

M. Muir, Heng Wei Cheng, 2013-04-22 Many behaviors in poultry can be modified by genetic selection. Selection of laying hens for maximum egg production had the unfortunate side effect of increased rates of beak inflicted damage on other birds. Selective breeding has eliminated broodiness and has either increased or decreased other behaviors such as hysteria, fearfulness, appetite in broilers, social dominance ability, and damage to other birds. Genetic selection can be used to reduce behaviors that cause welfare problems. However, it must be approached with caution to avoid unintended consequences that would be detrimental to welfare. A calm, docile bird that appears behaviorally calm may take longer for its heart rate to return to normal after it is frightened. The use of group selection instead of single bird selection can be effectively used to reduce undesirable behaviors such as feather pecking and to maintain high egg production. An entire group of birds is selected instead of selecting individuals.

Genetics and the Behavior of Domestic Animals Temple Grandin, Mark J. Deesing, 2013-04-22

Behavior is shaped by both genetics and experience, nature and nurture. This book synthesizes research from behavioral genetics and animal and veterinary science, bridging the gap between these fields. The objective is to show that principles of behavioral genetics have practical applications to agricultural and companion animals. The continuing domestication of animals is a complex process whose myriad impacts on animal behavior are commonly underappreciated. Genetic factors play a significant role in both species-specific behaviors and behavioral differences exhibited by individuals in the same species. Leading authorities explore the impact of increased intensities of selection on domestic animal behavior. Rodents, cattle, pigs, sheep, horses, herding and guard dogs, and poultry are all included in these discussions of genetics and behavior, making this book useful to veterinarians, livestock producers, laboratory animal researchers and technicians, animal trainers and breeders, and any researcher interested in animal behavior. Includes four new chapters on dog and fox behavior, pig behavior, the effects of domestication, and horse behavior. Synthesizes research from behavioral genetics, animal science, and veterinary literature. Broaches fields of behavior genetics and behavioral research. Includes practical applications of principles discovered by behavioral genetics researchers. Covers many species ranging from pigs, dogs, foxes, rodents, cattle, horses, and cats.

Welfare of the Laying Hen G. C. Perry, 2004-01-01

The welfare of egg-producing poultry is a topic of great concern to the poultry industry and to researchers in applied animal behavior. It is also subject to increased legislation. Issues such as battery cages, space requirements, access to daylight, and free range eggs have attracted public interest.

Marker-assisted Selection Food and Agriculture Organization of the United Nations, 2007-01-01 A comprehensive description and assessment of the use of marker-assisted selection for increasing the rate of genetic gain in crops, livestock, forestry, and fish, including the related policy. FAO's tradition of dealing with issues of importance to agricultural and economic development in a multidisciplinary and cross-sectoral manner.
