

Macromolecules - Answers

1. An amino acid contains a central carbon atom, a hydrogen atom, a carboxyl group, an amino group group, and a differing R group.
2. What is a dipeptide? What type of bond is involved? = two amino acids joined via a peptide bond.
3. A nucleotide is a monomer of nucleic acids. There are 4 (how many) different types of nucleotides. (for either RNA or DNA)
4. State two functions of fats.
long term energy storage
insulation
lubrication
cushioning
5. What is the structure of a phospholipid? hydrophilic head group, with a phosphate - always charged and a group of atoms (ex. choline, serine); two hydrophobic tails, fatty acids with long hydrocarbon chains
6. ATP is a molecule that stores a great deal of energy within its phosphate bonds. True or False? True
7. Name and state the structure of a common disaccharide.
two sugars joined via covalent bond; ex. glucose-glucose = maltose; glucose-fructose = sucrose
8. Name and state the structure of a common polysaccharide.
glycogen and starch = polymers of alpha glucose; storage form of glucose in animals and plants
cellulose = polymers of beta glucose; rigid structure in plant cell walls
chitin = polymer of glucosamine; very strong and flexible; found in exoskeletons of arthropods
9. Heating an enzyme to a certain temperature usually destroys its enzymatic activity even though the same sequence of amino acids remains. Name and explain the levels of structure that have been affected by heating.
secondary structure = alpha helices, beta pleated sheets, random coils
tertiary structure = overall three dimensional conformation, or shape, of the polypeptide
quaternary structure = assembly of subunits

primary structure = chain of amino acids; usually remains intact upon denaturation due to strong peptide bonds.

Study Guide, Biology of Microorganisms, Fifth Edition, Thomas D. Brock & Michael T. Madigan Allan Konopka, Thomas D. Brock, 1988 **Biology of Microorganisms** Thomas D. Brock, Michael T. Madigan, 1991 *Books in Print*, 1979

Catalog of Copyright Entries. Third Series Library of Congress. Copyright Office, 1973 *Macromolecules* Finn Wold, 1971 In this book we discuss the status of the structure function analysis of biological macromolecules and macromolecular complexes The ultimate goal of the analysis must be to explain all the functional properties of the molecules in question in terms of their completely defined three dimensional structure and the analysis thus contains three separate components the determination of structure the determination and quantitation of function and final correlation of this information into the structure function model The first component the structural analysis is reviewed only briefly and this book therefore leans heavily on Barker's and Van Holde's books in this series for proper background and documentation for this component The second component the analysis of functional properties is given broader consideration Chapters 1, 2, 5 and 9 but the main emphasis has been the step by step development of the structure function models It is hoped that this approach will clearly illustrate the typical progression of scientific model building from the first clear definition of the problem and the statement of the hypothesis through ever increasing refinements of experimental tests toward the final answer It is also hoped that the statements of philosophy principles and scientific method that are the bases for this approach are of broad enough validity to survive even after its models have become obsolete With this approach it is essential to inform the reader in unequivocal terms that this book is not a summary of final conclusions and complete stories which can be submitted to memory Each system discussed should be considered very critically and the models should be evaluated in terms of the available evidence The only facts are the experimental data the interpretation of this data into models is only convincing to the extent that it makes logical sense to the individual examining it Since both space and common sense prohibits a continuous reiteration of this statement throughout the book be prepared to encounter some models and hypotheses which are based on sound experimental evidence as well as some which have no experimental basis at all In neither case are they facts but in either case they represent ideas which can be subjected to further experimental tests If the book helps to sharpen this critical evaluation of both ideas and the experimental test of the hypotheses one of its major purposes has been fulfilled **Medical and Health Care Books and Serials in Print**, 1997 *Subject Guide to Books in Print*, 1983 **Biology** Joseph S. Levine, Kenneth R. Miller, 1998 **Whitaker's Cumulative Book List**, 1983 *National Library of Medicine Current Catalog* National Library of Medicine (U.S.), 1971 *National Union Catalog*, 1956 Includes entries for maps and atlases **The Publishers' Trade List Annual**, 1976 **Technical Book Review Index**, 1984 **The British Library General Catalogue of Printed Books 1986 to 1987** British Library, 1988 *Current Catalog*, 1971 First multi year cumulation covers six years 1965-70 *Paperbacks in Print*, 1971 **Biological Abstracts**
