

Genetics Problem Solving

Please bring your textbook to this laboratory session.

A. Objectives

Become familiar with

1. Probability calculations
2. Solving genetics problems

B. Before lab

3. Read *Probability is used to predict inheritance and Mendel's laws can be observed in human pedigrees* on pages 150-151 of your textbook. Also, review linked genes and the construction of genetic maps on pages 156-158.
4. In your notebook, answer questions 1-3, 11, and 21 - 23 in part E below.

C. During lab

In groups of four, work through the genetics problems. You can fill your answers directly into the worksheet. However, remember to include this exercise in the table of content of your lab notebook, glue the pages in and have them signed by your instructor.

D. After lab

1. Finish the worksheet if you have not done it in lab.
2. Practice solving genetics problems (e.g.,
<http://www.ndsu.nodak.edu/instruct/mcclean/plsc431/mendel/mendel1.htm>)

E. Predicting the outcome of various crosses

1. A female carrier of Tay-Sachs wants to have a child with a male carrier for Tay-Sachs. Tay-Sachs is inherited in an autosomal recessive manner. Using the letters "T" and "t" fill out the following table.

	Female	Male
Genotype		
Phenotype		
Genotypes of sperm/ova		

2. Determine the probability of them having a child with Tay-Sachs using a Punnett square (page 147 in Hillis).

Tools, Methodologies and Techniques Applied to Sustainable Supply Chains
Jorge Luis García-Alcaraz,2020-02-21 Supply chains are currently globalized and companies operate internationally owing to the fact that raw materials production processes and the consumption of the final products are carried out in different countries This implies high material and information flow which incurs high costs associated with the supply chain and logistics sometimes up to 60% of the total cost of the product Therefore companies seek to optimize their resources to reduce these costs and improve sustainability in a globalized market This book entitled Tools Methodologies and Techniques Applied to Sustainable Supply Chains contains 15 chapters that report case studies applied to industrial and service sectors The authors come from areas such as Mexico Colombia Italy Sweden Slovakia China and Australia They indicate how managers make use of tools and techniques to solve problems associated with supply chains to reduce their cost and remain competitive A great effort has been made to analyze this problem and the methodologies are clearly described here to facilitate the reproducibility of each technique and tool This was done in the hope that hoping that they may one day be applied in more companies

Genetics and the Behavior of Domestic Animals
Temple Grandin,Mark J. Deesing,2013-04-22 The partnership between humans and domestic animals is natural The human brain is hard wired to emotionally respond to animals Beginning with the domestication of wolves this chapter covers the process of domestication and reviews the early work of behaviorists and ethologists who refused to accept emotional states in animals Modern behavior research employs methods developed by behaviorists and ethologists combined with neuroscience and genetics Emotional systems in the brain drive behavior Confusion between different emotional systems may explain conflicting findings in the behavior literature Behavior in an open field test may be motivated either by fear separation distress or novelty seeking Each emotion is controlled by separate subcortical systems A novel open field arena can frighten a prey species but it may activate seeking in a predator Genetics affects the strength of fear novelty seeking and separation

distress Behavior is shaped by a complex interaction between genetics and experience Basic Genetics Robert F. Weaver, Philip W. Hedrick, 1995 This text provides a balanced coverage of clinical and molecular genetics Experimental highlights and extensive use of learning aids are used throughout After a broad introduction to the topic the book is divided into 3 parts Part one explores Mendelian genetics including chromosomes and genetic linkage Part two looks at molecular genetics covering chemistry of a gene repluation and recombination of genes and transcription and its control in prokaryotes The final part introduces population genetics and discusses some of their extensions and applications Solving Equine Behaviour Problems Rose M. Scofield, 2020-09-22 Horses can develop a range of behavioural problems which if left untreated could cause the relationship between horse and human to break down With many different well meaning opinions offered to solve such situations it can be difficult to find the right path In this book Rose Scofield examines behavioural issues using the latest academic research Offering practical solutions and with useful diagrams and photographs throughout the book helps to protect and develop the horse human relationship Educating the Gifted William C. Walsh, 2012-12-06 Let us then consider for a moment the world as described by the physicist It consists of a number of fundamental particles which appear bound by certain natural laws which indicate the form of their relationship_ Now the physicist himself who describes all this is in his own account himself constructed of it He is in short made of a conglomeration of the very particulars he describes no more no less bound together by and obeying such general laws as he himself has managed to find and to record Thus we cannot escape the fact that the world we know is constructed in order and thus in such a way as to be able to see itself This is indeed amazing Not so much in view of what it sees although this may appear fantastic enough but in respect of the fact that it can see at all But in order to do so evidently it must first cut itself up into at least one state which sees and at least one other state which is seen In this severed and mutilated condition what ever sees is only partially itself We may take it that the world undoubtedly is itself i e is indistinct from itself but in any attempt to see itself as an object it must equally undoubtedly act so as to make itself distinct from and therefore false to itself In this condition it will always partially elude itself **Resources in Education** , 2001-04
