Migrations of Fines in Porous Media Kartic C. Khilar,H. Scott Fogler,2013-06-29 This is the first book entirely on the topic of Migration of Fine Particles in Porous Media There are two purposes for the use of this book First the book is intended to serve as a comprehensive monograph for scientists and engineers concerned with problems of erosion pollution and plugging due to migration of fines in porous media Second the book is recommended to be used as a reference book for courses offered at senior or graduate level on the topics of flow through porous media soil erosion and pollution or formation damage The migration of fine particles in porous media is an engineering concern in oil production soil erosion ground water pollution and in the operation of filter beds As a result the topic has been studied by researchers working in a number of disciplines These studies in different disciplines are conducted by and large independently and hence there is some repetition and perhaps more importantly there is a lack of uniformity and coherence These studies nevertheless complement each other To illustrate the point consider for example the migration of fine particles induced by hydrodynamic forces

Disciplines as Frameworks for Student Learning Tim

Riordan,James Roth,2023-07-03 What should students be able to do and how should they be able to think as a result of study in a discipline What does learning in the disciplines look like at different developmental levels How does one go about designing such learning and assessment in the disciplines What institutional structures and processes can assist faculty to engage and teach their disciplines as frameworks for student learning Creating ways to make a discipline come alive for those who are not experts even for students who may not take more than one or two courses in the disciplines they study requires rigorous thought about what really matters in a field and how to engage students in the practice of it Faculty from Alverno College representing a range of liberal arts disciplines chemistry economics history literature mathematics and philosophy here reflect on what it has meant for them to approach their disciplines as frameworks for student learning They present the intellectual biographies of their explorations the insights they have gained and examples of the practices they have adopted The authors all demonstrate how the ways of thinking they have identified as significant for their students in their respective disciplines have affected the way they design learning experiences and assessments They show how they have shaped their teaching around the ways of thinking they want their students to develop within and across their

disciplines and what that means in terms of designing assessments that require students to demonstrate their thinking and understanding through application and use This book will appeal to faculty interested in going beyond mere techniques to a more substantive analysis of how their view of their respective disciplines might change when seen through the lens of student learning It will also serve the needs of graduate students trainers of Tas and anyone engaged in faculty development or interested in the scholarship of teaching *Chemical Matter* Prentice-Hall Staff,1994 Authorized teaching resource in Alberta for senior high science 14 24 1995 2004 *Biochemistry* John T.
