Samsung Manual Scx 3405w:

Goal-based Reasoning for Argumentation Douglas Walton, 2015-08-25 This book provides an argumentation model for means end reasoning a distinctive type of reasoning used for problem solving and decision making Means end reasoning is modelled as goal directed argumentation from an agent s goals and known circumstances and from an action selected as a means to a decision to carry out the action Goal based Reasoning for Argumentation provides an argumentation model of this kind of reasoning showing how it is employed in settings of intelligent deliberation where agents try to collectively arrive at a conclusion on what they should do to move forward in a set of circumstances The book explains how this argumentation model can help build more realistic computational systems of deliberation and decision making and shows how such systems can be applied to solve problems posed by goal based reasoning in numerous fields from social psychology and sociology to law political science anthropology cognitive science artificial intelligence multi agent systems and robotics **Samsung**
