EXAM – POSSIBLE QUESTIONS

SHORT QUESTIONS

What is the most fundamental task of philosophy of science?

- It is to ask "what is science?"
- The demarcation problem in the philosophy of science is about how to distinguish between science and non-science, including between science, pseudoscience, and other products of human activity, like art and literature, and beliefs.

What is epistemology?

- It is the study of the nature and the justification of knowledge

Briefly explain the JTB theory of knowledge

- Widely accepted that knowledge is justified, true, belief.
- Proposition must be true
- Believe the proposition
- Justification for our beliefs
- Justification thought provided by following the scientific method for testing or arriving at our beliefs

How might the philosophical study of science be helpful for epistemology?

- By studying nature and how to justify knowledge, the facts found in the study of science can be more valid, gain credibility and becoming more true

What is metaphysics?

- Study of objects and events and the forces that cause or impinge upon them. That which causes reality and the things we see

Why is it often thought that science has replaced metaphysics?

- It has replaced metaphysics not just by telling us about what exists and explaining what happens in terms of laws of nature and causation but also answering other fundamental philosophical questions about, say, the nature of space and time

What is the Copernican Revolution?

- Name given to the period during which the theory of the solar system and the wider cosmos, which had the Earth at the centre of everything (geocentrism) introduced by Ptolemy, was replaced by the theory that the Earth revolved around the sun (heliocentrism) introduced by Copernicus.
