

Emily Boltran
Period 3
Fall of Rome DBQ

The Roman Empire, a once flourishing and powerful society, which reigned from the years 395 AD to 476 AD, would soon collapse. For several years the empire was bombarded with several issues which would ultimately lead to its downfall. After many years of corruption, struggle, and destruction Rome took its final blow in 476 AD. The German leader Odoacer staged a revolt, Romulus Augustus, the final Roman emperor, was forced to renounce his efforts and Odoacer took control of Italy. This was the final component of a lengthy chain reaction. The fall of the Western Roman Empire was brought up as a result of a plethora of factors. However, the political issues which took place within the empire were a direct cause of the empire's fall. The empire was brought down from the inside, as the political factors which it faced led to an internal chaos, lack of organization and divided empire.

With its vast territory, influential trade routes and endless impacts on the world the Roman Empire compared to no other. However, one of the empire's breaking points would be the lack of organization which would eat away at the empire. The Roman Empire expanded so greatly it is known today as one of the largest empires in the ancient world, inhabiting 50 to 90 million people. To govern over such a significantly large region and population, great organization is needed to keep society in order. This was one of the major factors that the empire lacked, more organization would be one of the factors which contributed to its fall. The people were pushed away from political matters and their every move was in the hands of corrupt leaders who were not aware or chose to disregard the chaos they were spreading across the empire. The empire could not organize, it could not support a military, it was unable to have a stable economy. (Document 1) The author's purpose in writing this document is to show the effects of the disorganization in the empire. This disorganization arose from the political conflicts which were taking place within the empire. As those in power attempted to grow themselves wealthier the people did not have the means to survive. Chaos reigned throughout the empire, for the power of the few. Ultimately the fall of Rome was inevitable due to its size. (Document 2) Its size alone was a factor to consider when determining the causes of the fall of the empire. However, the main issue was the fact that this vast territory could not be effectively governed. The leaders could not organize the many people, the many micro economies, the trade routes, and a great deal of other matters. The methods of dividing power were typically careless and ineffective. For such an empire to survive organization had to be a top priority yet this need was pushed to the side. This lack of organization could have easily been avoided with the proper political actions and governance. Despite this those who had power over the common people had their own interests as the main priority. The Western Roman Empire would fall as a result of the internal issues caused by the lack of a strong political system.

Although it is argued that religion was one of the major factors which led to the fall of the Roman empire, the true root of the issue between religion and the empire arose from the instability of political ideas and the lack of unity throughout the empire. Based on the information provided in Document 4 it can be established that, the government eliminated individualistic ideas and took responsibility over all affairs. The people left with no voice, no valid opinion, were in a place of weakness. They were no longer the once self-reliant and initiative people. The author's purpose in writing this document was to demonstrate how the people of the Roman empire were impacted by the political influence of the government.

Best Practices in Social Studies Assessment Mark Percy, 2017-03-01

The importance of social studies assessment is beyond question. The National Council of the Social Studies C3 Framework recognizes the importance of high quality assessments its major objective a deep understanding of the sociocultural world has as its underpinning the idea that students must be able to investigate the world and that teachers must be able to assess their understanding of it. However there is a comparative dearth of research that focuses on effective social studies assessment particularly with regard to the impact of teacher practice on the development of best practices. Such research is vital to moving social studies away from an emphasis on testing and more towards using assessment as a means of educating our students. In *Best Practices of Social Studies Assessment* we focus on an essential question what is an effective assessment. Helping teachers develop practical creative curriculum appropriate strategies is essential especially in an era in which teachers are faced with the dilemma of creating inquiry based assessments in the midst of preexisting regimes of standardized summative assessments. In this volume research conducted between university professors and working teachers is described focusing on innovative assessment practices. These practices include role playing activities depicting historical events Socratic seminars revolving around public policy issues collaborative student projects on a wide range of social inquiries including the implementation of UN programs and the promotion of critical thinking and writing skills on subjects as diverse as school violence and the impact of imperialism. These adaptive assessments highlight the essential role of the teacher in creating assessments that blend higher order critical thinking complex content knowledge and an understanding of their own students. The strategies described in this volume focus on the ability of expert educators to acknowledge the structures power and consequences of high stakes testing regimes while simultaneously designing and sustaining classroom

assessment methods that embody the social participatory nature of learning and reflect research on effective practice p 289 The volume also describes the shared characteristics of the teachers who created these assessments especially their emphasis on self reflection and student autonomy as well as their professional willingness to take on challenges associated with performance based assessments even in the face of institutional pressures and external demands

Stuckart,2018-01-11 Despite the founding of the modern social studies curriculum nearly a century ago based on John Dewey s pragmatism philosophy the field has never achieved a significant and broad implementation of his ideas Dewey s instrumentalism offers social studies educators a tool for addressing vexing problems such as whether they should design classroom experiences using a traditional or a social studies approach to learning history the role of digital technologies the purpose and challenges of younger learners working with an expanding horizons curriculum and many more At the same time Dewey s time tested theories describe how students use the social studies curriculum to make meaning as well as provide teachers a blueprint for implementing engaging and interactive lessons We have neglected Dewey which has led to confusion student disinterest and widespread teaching methodologies contrary to theoretical and research best practices Revisiting Dewey provides the why and how of what we do an ideal for creating a challenging and rigorous social studies curriculum while engaging students interests
