Allen,2015-03-14 This volume provides a comprehensive overview of quality metrics

and methods used to improve quality for all major modalities of CRC screening. It introduces the readers to the evidence of effectiveness behind various CRC screening modalities: stool based tests, Fecal Occult Blood, Fecal Immunochemical, and Fecal DNA tests; flexible sigmoidoscopy; colonoscopy; and CT colonography. In depth chapters review the latest guidelines for CRC screening, compare differences among the five major national guidelines, and highlight the need for valid quality and cost indicators. While the main focus of this volume is on colonoscopy, since most quality indicators and analyses have focused on this modality of screening and surveillance, one chapter is devoted to quality indicators of other screening modalities. Differences between process and outcome measures are also highlighted, and a small but valid set of recommended national measures are listed. Written by experts in the field, **Colorectal Cancer Screening: Quality and Benchmarks** is an important and useful resource written for gastroenterologists, primary care physicians, general and colorectal surgeons, family physicians, and investigators with research focus in screening and quality metrics.

Clinical Practice Guidelines for Midwifery & Women's Health Tharpe, Cindy L. Farley, Robin G. Jordan, 2016-05-20. **Clinical Practice Guidelines for Midwifery Women's Health** Fifth Edition is an accessible and easy to use quick reference guide for midwives and women's healthcare providers. Completely updated and revised to reflect the changing clinical environment, it offers current evidence based practice, updated approaches and opportunities for midwifery leadership in every practice setting. Also included are integrative, alternative and complementary therapies. The Fifth Edition examines the transition to the use of ICD 10 codes, women's health policy and advocacy, risk assessment and decision making in practice, and inspiring trust in midwifery care. New clinical practice guidelines include health promotion and primary care practice such as promoting restorative sleep, optimizing oral health, promoting a healthy weight, and caring for the woman with a substance abuse disorder.
