Politics Derek Robbins, 2022-01-11 Through six articles written at intervals of about a decade between 1960 and 2020 the book provides an account of the author's developing political awareness during the period in the context of political events and changes. In this way the book illustrates the social origins of political attitudes while at the same time the articles raise questions about the increasing dominance of political discourse in society. The book suggests that politics is now excessively managed by political professionals and that the challenge for reviving democratic participation is to restore the social dimension of state membership.

Understanding and Evaluating Qualitative Educational Research Marilyn Lichtman, 2011 When learning how to read, analyze and design one's own research it is useful to review examples of similar research. *Understanding and Evaluating Qualitative Educational Research* uses published research articles to teach students how to understand and evaluate qualitative research in education. Each example within a category of qualitative research (ethnography, grounded theory, phenomenology, case study, action research, narrative and mixed methods) is accompanied by commentary from the editor regarding why the particular approach was used and how and why the various aspects of the example relate back to the approach taken. This commentary guides students in learning how to read, analyze and create their own qualitative research studies. Included in the text is a series of Issues and Concepts that are at the forefront of the changing field. This text gives students in qualitative educational research a well-rounded and practical look at what qualitative research is along with how to read, analyze and design studies themselves.
