Introduction

DISCLAIMER

This document is intended for use by authorized Nokia service centers only.

"Service Schematics" was created with focus on customer care. The purpose of this document is to provide further technical repair information for Nokia mobile phones on used full service centers. It contains additional information such as, e.g., "Component finder". The "Signal overview" page gives a good and fast overview about the most important signals and voltages on board. Taking process time and ensuring the repair quality is the aim of this document. It is to be used additionally to the service manual and other training or service information such as Technical Bulletin.

Measurement was made with following equipment:

Logic Analyzer	• Phoenix version 2004/14.1.204
Oscilloscope	• Fluke PM 1000A/B
Spectrum Analyzer	• Advanced K1132 with an analog probe
Antenna Analyzer / SWR Tester	• Rohde & Schwarz ZNA 200
Multimeter	• Fluke 75 Series 2

While every endeavor has been made to ensure the accuracy of this document, some errors may exist. If the reader finds any errors, Nokia shall be notified in writing.

Please send E-Mail to: casinoware@nokia.com

A NEW FEATURE FOR RM-159, 175

We have redefined these measurement points  which are related to the oscilloscope shown on the signal overview page. As example clicking on the measurement point  guide you to the matching settings on the signal overview page. The next click into the new chosen signal guide you to the related measurement point on the module. Finally, clicking OK, turn into the measurement point  on the module, takes you back to the starting point inside the schematics.

H.R. Vishwakarma, Shyam Akashe, 2017-07-05. The book is a compilation of technical papers presented at International Research Symposium on Computing and Network Sustainability IRSCNS 2016 held in Goa, India, on 1st and 2nd July 2016. The areas covered in the book are sustainable computing and security, sustainable systems and technologies, sustainable methodologies and applications, sustainable networks, applications and solutions, user-centered services and systems, and mobile data management. The novel and recent technologies presented in the book are going to be helpful for researchers and industries in their advanced works. *Multimedia Interaction and Intelligent User Interfaces* Ling Shao, Caifeng Shan, Jiebo Luo, Minoru Etoh, 2010-09-11. Consumer electronics (CE) devices providing multimedia entertainment and enabling communication have become ubiquitous in daily life. However, consumer interaction with such equipment currently requires the use of devices such as remote controls and keyboards, which are often inconvenient, ambiguous, and non-interactive. An important challenge for the modern CE industry is the design of user interfaces for CE products that enable interactions which are natural, intuitive, and fun. As many CE products are supplied with microphones and cameras, the exploitation of both audio and visual information for interactive multimedia is a growing field of research. Collecting together contributions from an international selection of experts, including leading researchers in industry, this unique text presents the latest advances in applications of multimedia interaction and user interfaces for consumer electronics. Covering issues of both multimedia content analysis and human-machine interaction, the book examines a wide range of techniques from computer vision, machine learning, audio and speech processing, communications, artificial intelligence, and media technology. Topics and features include: novel computationally efficient algorithms to extract semantically meaningful audio-visual events; investigates modality allocation in intelligent multimodal presentation systems taking into account the cognitive impacts of modality on human information processing; provides an overview on gesture control technologies for CE; presents systems for natural human-computer interaction; virtual content insertion and human action retrieval; examines techniques for 3D face pose estimation, physical activity recognition, and video summary quality evaluation; discusses the features that characterize the new generation of CE; and examines how web services can be integrated with CE products for improved user experience. This book is an essential resource for researchers and practitioners from both academia and industry working in areas of multimedia analysis, human-computer interaction, and interactive user interfaces. Graduate students studying computer vision
